Number of BHO Prescriptions and Prescription Recipients by Therapeutic Class: Non-Priority Population by Sex and Race.....	33

EXECUTIVE SUMMARY

During the fiscal year 2003, there were over 1.6 million individuals eligible to receive services through the Partners Program for some period of time, regardless of the length of the eligibility period. Two-thirds of the enrollees are white, and 27% are black. Children under age 18 total 41% of the total population eligible to receive services. Region 2 contains the greatest number of enrollees. The SPMI population totals 97,417 enrollees, while there are 30,553 individuals in the SED population and 1,514,822 non-priority eligibles. Although the racial distribution for SED enrollees is quite similar to that of the total population, the distribution for SPMI is 74% white and 19% black. The greatest number of SPMI eligibles reside in Region 2, and the most SED enrollees are in Region 5.

Of the individuals eligible to receive services, 173,377 unduplicated enrollees were served during fiscal year 2003 (10.6%). The majority of persons served are white (74%). The greatest number of both adult and child persons served reside in Region 2. White enrollees (137 per 1000 eligibles) are served at a greater rate in urban areas, whereas black enrollees (87 per 1000 eligibles) are served at a greater rate in rural areas.

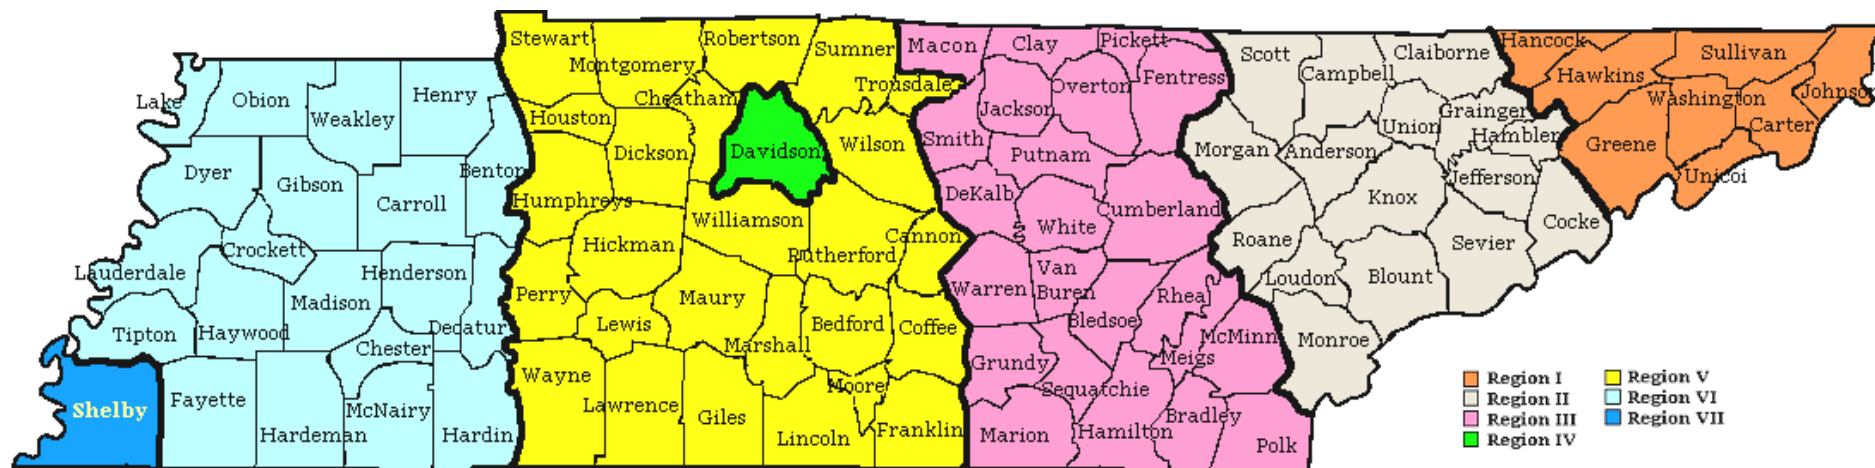

With respect to monthly utilization, more children receive outpatient therapy services than any other single type of service. For adults, case management services are accessed by the greatest numbers. The percentages of persons served receiving a given service type are similar across males and females for most services, although a greater percentage of males receive case management and females receive outpatient therapy. Additionally, a greater percentage of males receive psychiatric diagnostic interview exams. A greater percentage of white persons served receive outpatient therapy services, whereas a greater percentage of black persons served receive case management, medication management, and transportation services. Pharmacy utilization is greatest for antidepressant medications, with a total of 2,503,576 prescriptions for 290,760 unduplicated adult pharmacy recipients and 115,490 prescriptions for 21,522 unduplicated child pharmacy recipients. The second most utilized types of behavioral health medications are anti-anxiety medications for adults and anti-psychotic medications for children.

The total number of SPMI enrollees who received services during the year is 88,772, which is 91% of the SPMI eligible population. The majority of these individuals are white (74%). Blacks residing in urban areas comprise 29% of urban persons served, whereas blacks residing in rural areas comprise only 7% of rural persons served. Region 2 has the greatest number of SPMI consumers served, while the highest rate is in Region 7. This is a noteworthy increase for Shelby County, for which the rate was the 6th lowest of the seven regions during FY02. Medication management is the type of service most utilized by SPMI enrollees (64% of those receiving services). Antidepressant medications are most often prescribed for the SPMI population.

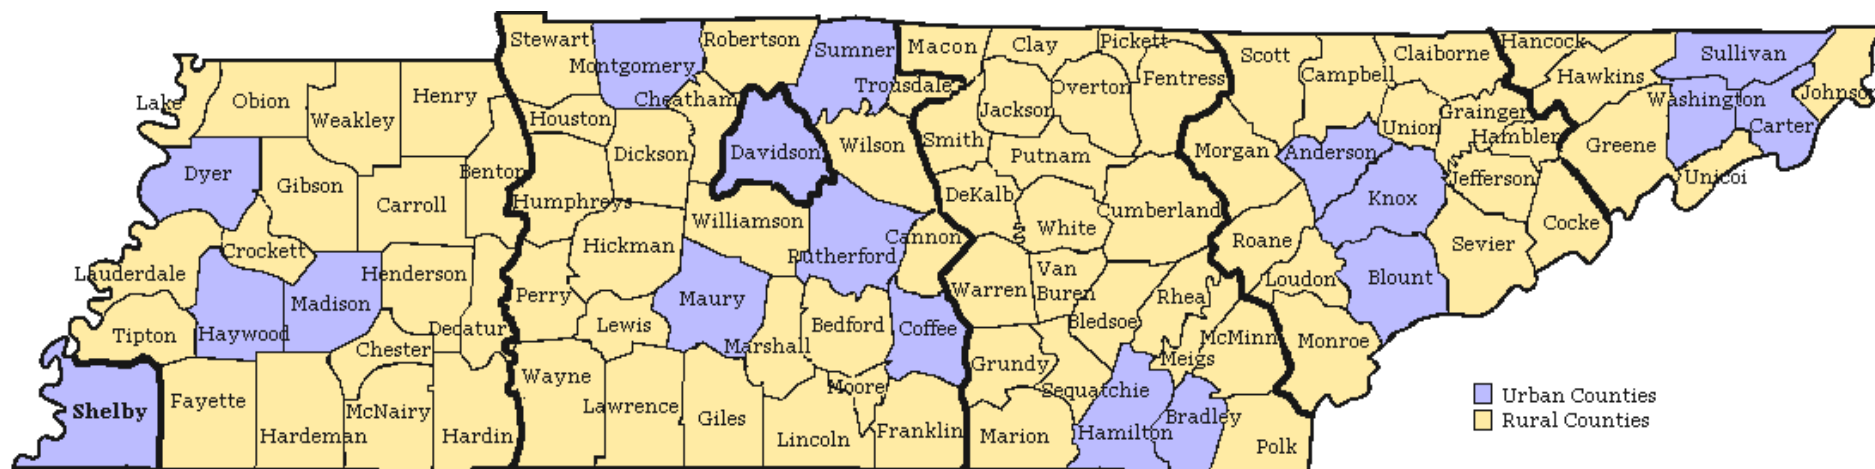

The percentage of SED enrollees receiving services is similar to that for the SPMI population (28,044 enrollees or 92%). 64% percent are white and 30% are black. The racial distribution of urban residents receiving services is 51% white and 42% black, compared to 84% white and 11% black for rural residents. The greatest number of SED enrollees served are from Region 5, although the rate of service is slightly lower than most of the other regions. Outpatient therapy services are utilized by 65% of those SED consumers receiving services; while 55% receive psychiatric diagnostic interview exams and 53% utilize case management. Antidepressant medications are most often prescribed for the SED population.

Of the total persons served in the quarter, 57,989 are non-priority enrollees, about 4% of the non-priority population. 79% are white and 16% are black. In urban areas, 69% of the persons served are white, and 91% of persons served residing in rural areas are white. Region 2 is the home of the greatest number of non-priority persons served and has the highest rate of service for children at 46 per 1000 eligibles. Outpatient therapy services are utilized by 43% of non-priority enrollees receiving services, and medication management is used by 26%. Antidepressant medications are most often prescribed for both adults and children of the non-priority population.

Mental Health and Developmental Disabilities Planning Regions

Tennessee Urban and Rural Counties

Rural counties are defined as those counties for which at least 50% of the geographic area is composed of unincorporated cities with a population of 2,500 or less. The remainder of the counties are defined as Urban. (Tennessee Statistical Abstract, 1994-95)

DESCRIPTION OF SERVICES COVERED IN THIS REPORT

Service Utilization Categories in this report are aggregates of similar services.

24 Hr Residential Treatment: UB-92 revenue codes 119, 129, 139, 149, and 159 (R&B, RTF) with bill type 11x.

Assessment: CPT codes 96100-96117 (CNS assessments/tests), 80100-80102 (drug testing), 82055 (chemistry, alcohol), 82145 (chemistry, amphetamine), 82520 (chemistry, cocaine), procedure codes Z2140 (intake), Z2150-Z2160 (CRG/TPG assessment), or UB-92 revenue code 918 (psychiatric/psychological services, testing).

Case Management: Procedure codes Y1405 (case management), Z2000-Z2002 (case management / coordination), or Z5000 (initiation of case management services).

Day Treatment: Procedure codes Y1356-Y1357 (day program).

Medication Management: CPT codes 90805, 90807, 90809, 90862 (psychiatric therapeutic procedures with medication management).

Outpatient Therapy Services: The following codes in conjunction with a primary diagnosis that is *not* substance abuse: CPT codes 90801 (psychiatric diagnostic interview exam) for adults age 21 and older, 90802 (psychiatric diagnostic interview exam), 90804, 90806, 90808, 90810-90814 (psychiatric therapeutic procedures, outpatient), 90845-90857 (other psychotherapy), 90841-90844 (individual medical psychotherapy with physician), procedure codes Y1353-Y1355 (outpatient therapy), or UB-92 revenue codes 919 (intensive outpatient program), 902-909 (psychiatric/psychological treatments, therapy), 914-917 (psychiatric/psychological services, therapy), 941 (other therapeutic services, recreational therapy), 942 (other therapeutic services, education/training) in conjunction with outpatient bill type (all bill types excluding 11x and 12x).

Partial Hospitalization: UB-92 revenue codes 912-913 (psychiatric/psychological services, partial hospitalization).

Psychiatric Diagnostic Interview Exam: CPT code 90801 for children (under age 21).

Psychiatric Hospitalization: UB-92 revenue codes 1x4, where x represents any digit (R&B, psychiatric).

Psychosocial Rehabilitation: Procedure codes Z2120-Z2121 (psychosocial rehabilitation service).

SA Inpatient: UB-92 revenue codes 1x6, where x represents any digit (R&B, detoxification), 1x8, where x represents any digit (R&B, rehabilitation), 944 (other therapeutic services, drug rehabilitation), or 945 (other therapeutic service, alcohol rehabilitation) in conjunction with inpatient bill type (11x or 12x).

SA Outpatient: UB-92 revenue codes 1x6, where x represents any digit (R&B, detoxification), 1x8, where x represents any digit (R&B, rehabilitation), 944 (other therapeutic services, drug rehabilitation), or 945 (other therapeutic service, alcohol rehabilitation) in conjunction with outpatient bill type (all bill types excluding 11x and 12x). Also included are codes defined under Outpatient Therapy Services in conjunction with a primary diagnosis of substance abuse.

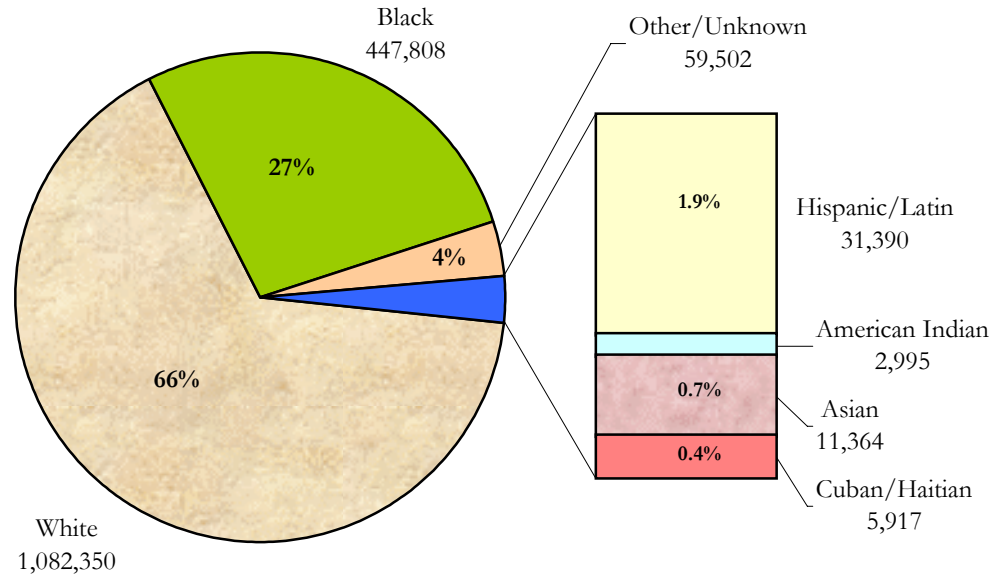

Supportive Employment: Procedure codes Z2130-Z2131 (supported employment services).

Supportive Living / Group Home: UB-92 revenue code 229 (other special charges, supported living) in conjunction with bill type 89x.

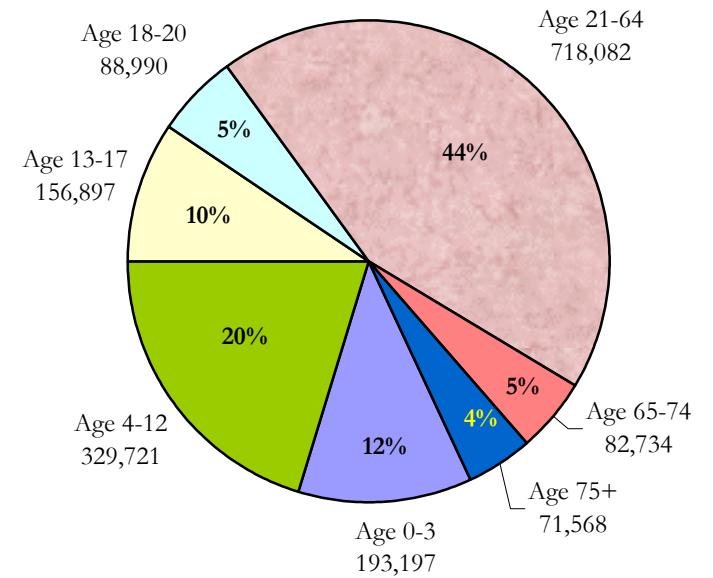

Transportation: Procedure codes A0010-A0999 (ambulance/transportation services) or UB-92 revenue codes 540-549 (ambulance).

Profile of Total TennCare Eligibles: FY 2003 (N=1,641,326)*

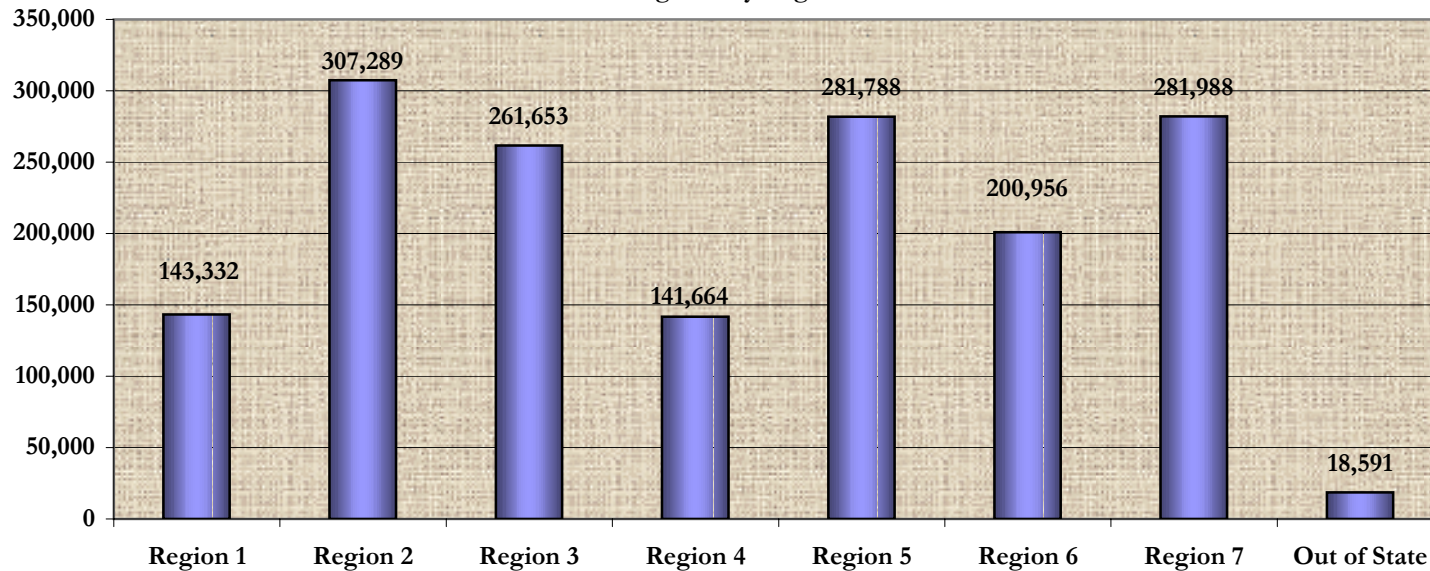

Eligibles by Race

Eligibles by Age Group

Eligibles by Region

Total TennCare Eligibles include all individuals eligible to receive services through the Partners program for some period of time between 7/1/02 and 6/30/03, regardless of length of eligibility period.

* The sum of the eligibles in these charts does not include 4,065 eligibles of unknown region and 137 eligibles of unknown age who are included in the total (N).

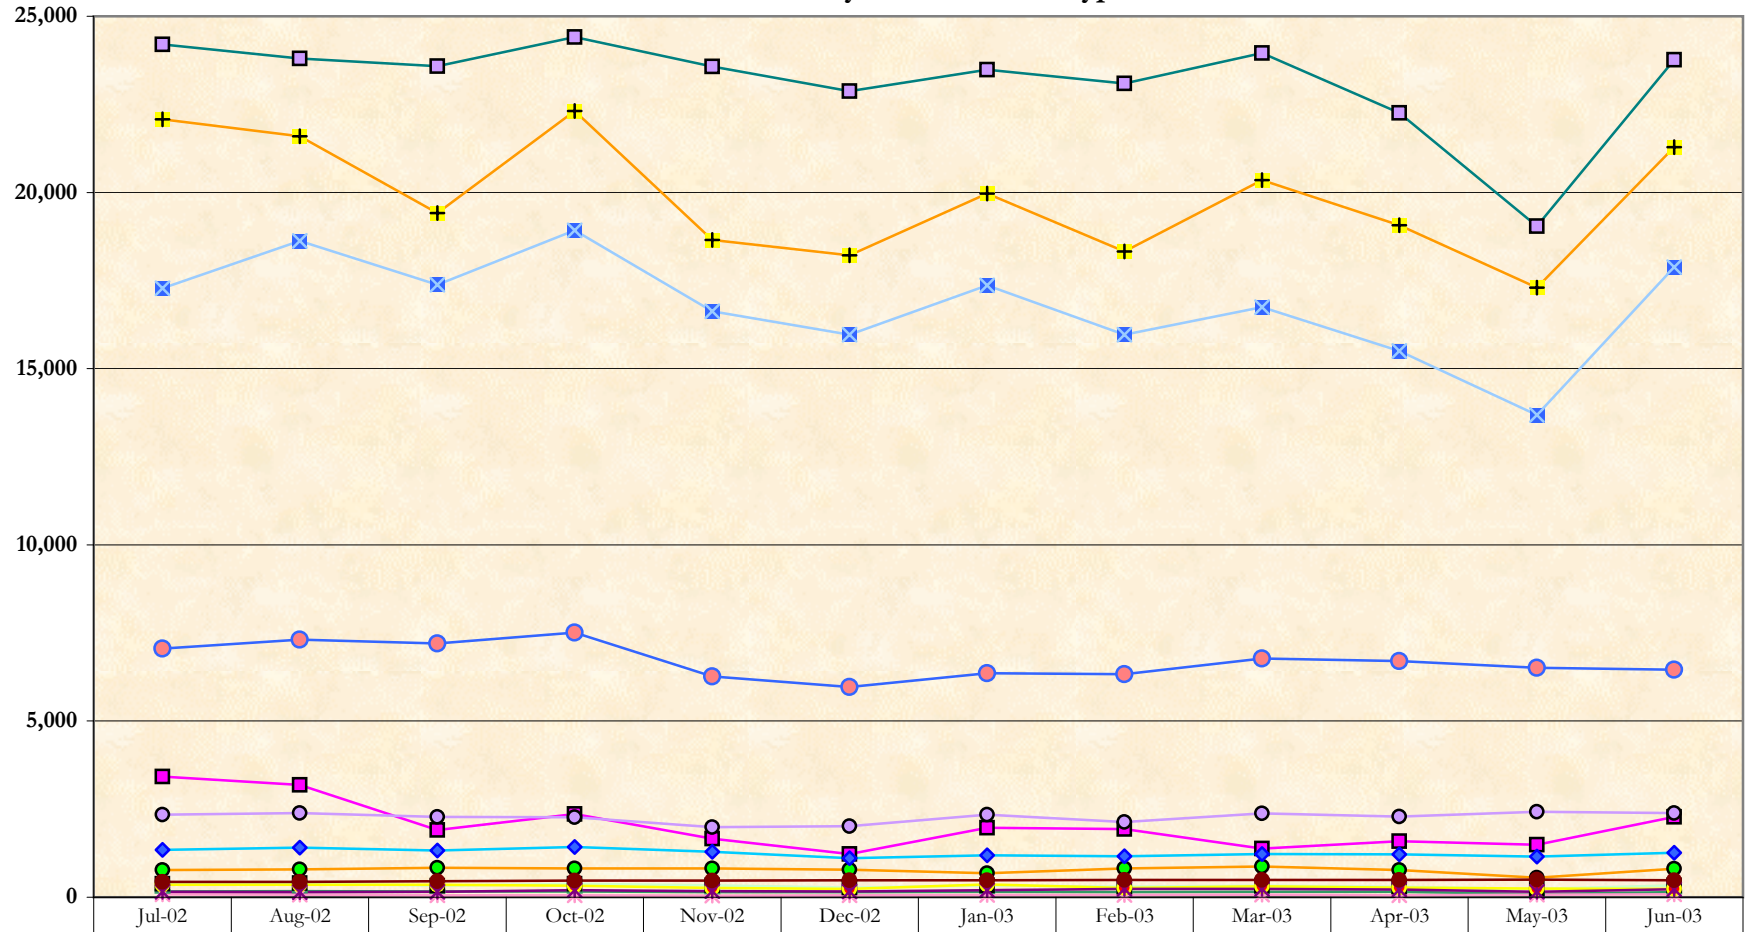

Due to rounding, the percentages in the pie charts may not add up to 100%.

Statewide Service Utilization by Select Service Types - Adults: FY 2003

Adults are defined as enrollees age 18 and over as of the date of the service received.

Counts presented in the table reflect the number of unduplicated enrollees who received each service type for each month. A given enrollee is represented only once in each cell, but may be included in multiple months and service types.

* Psychiatric Diagnostic Interview Exams (CPT code 90801) are reported separately for enrollees up to age 20. Figures in this table for this service reflect utilization by adults aged 18-20.

Profile of Unduplicated Persons Served by Race: FY 2003 (N=173,377)

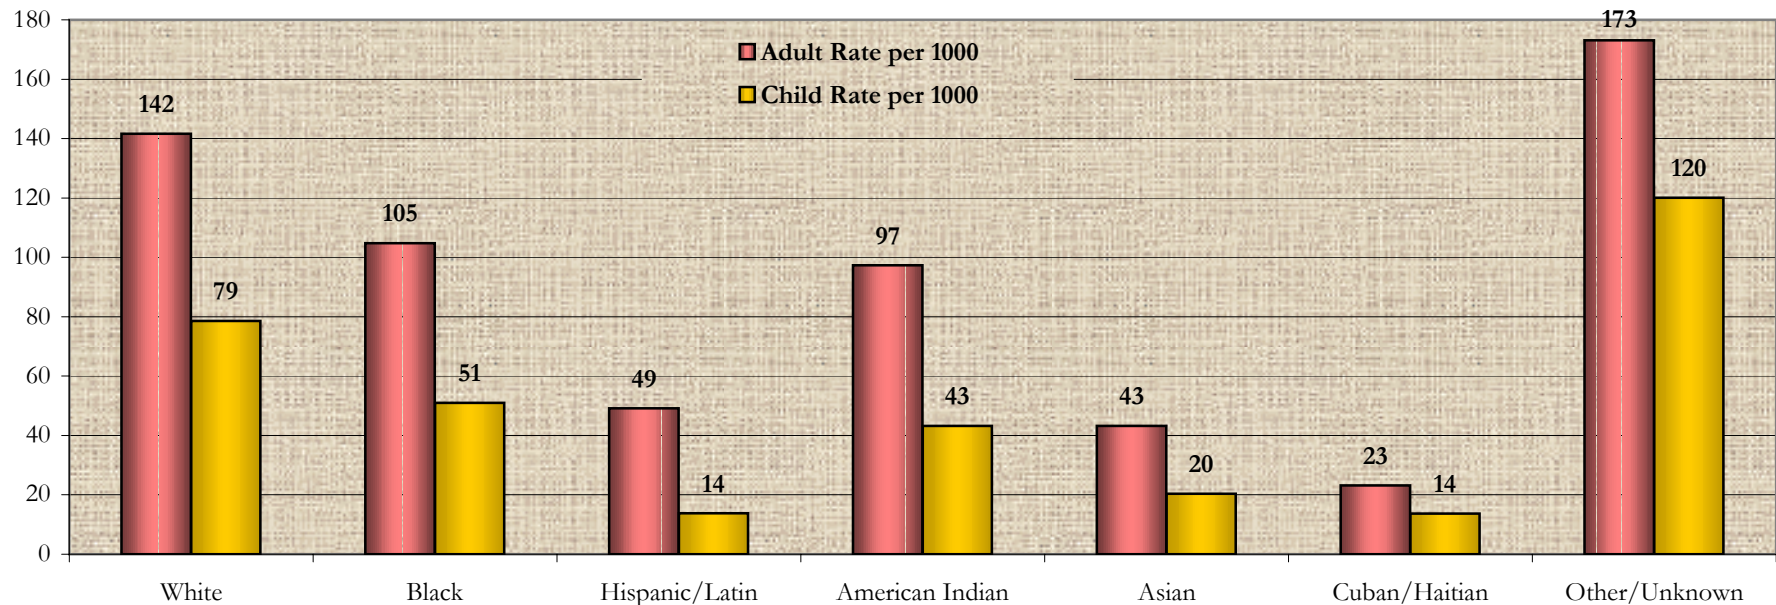

Unduplicated persons served refers to the number of unique enrollees who received services through the Partners program 7/1/02 to 6/30/03. Each individual is represented only once, regardless of the number of services received.

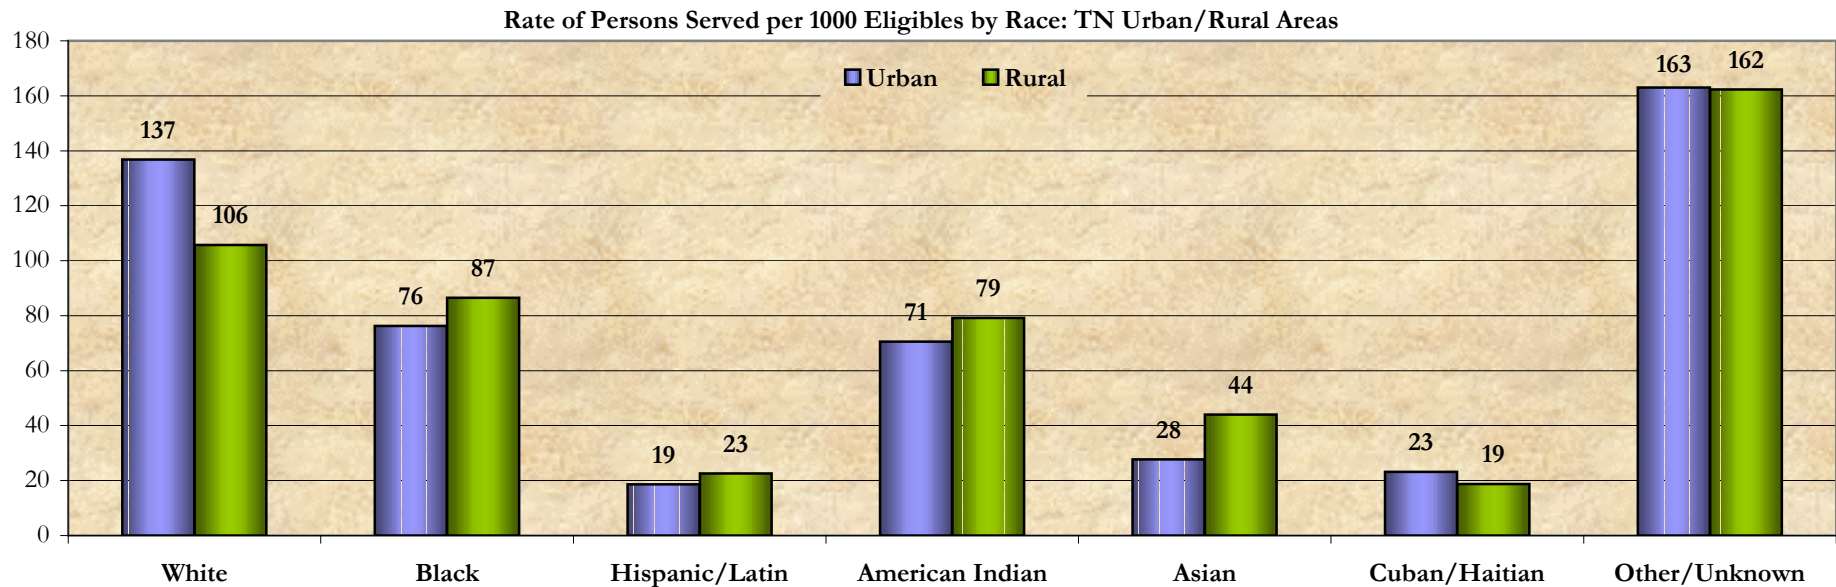

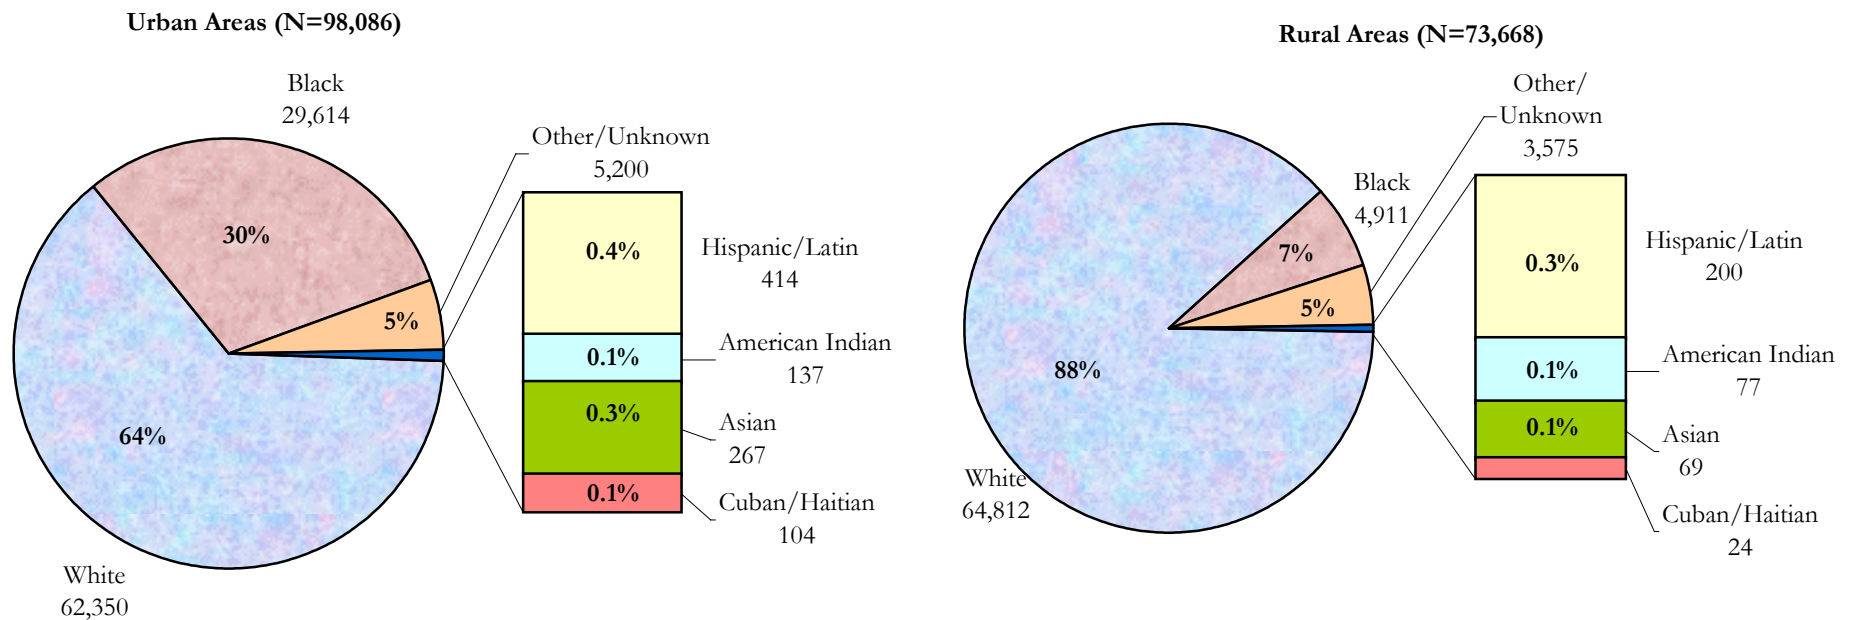

Rates are determined by dividing the number of persons served in each racial group by the number of eligible enrollees in each group and multiplying by 1000.

Due to rounding, the percentages in the pie chart may not add up to 100%.

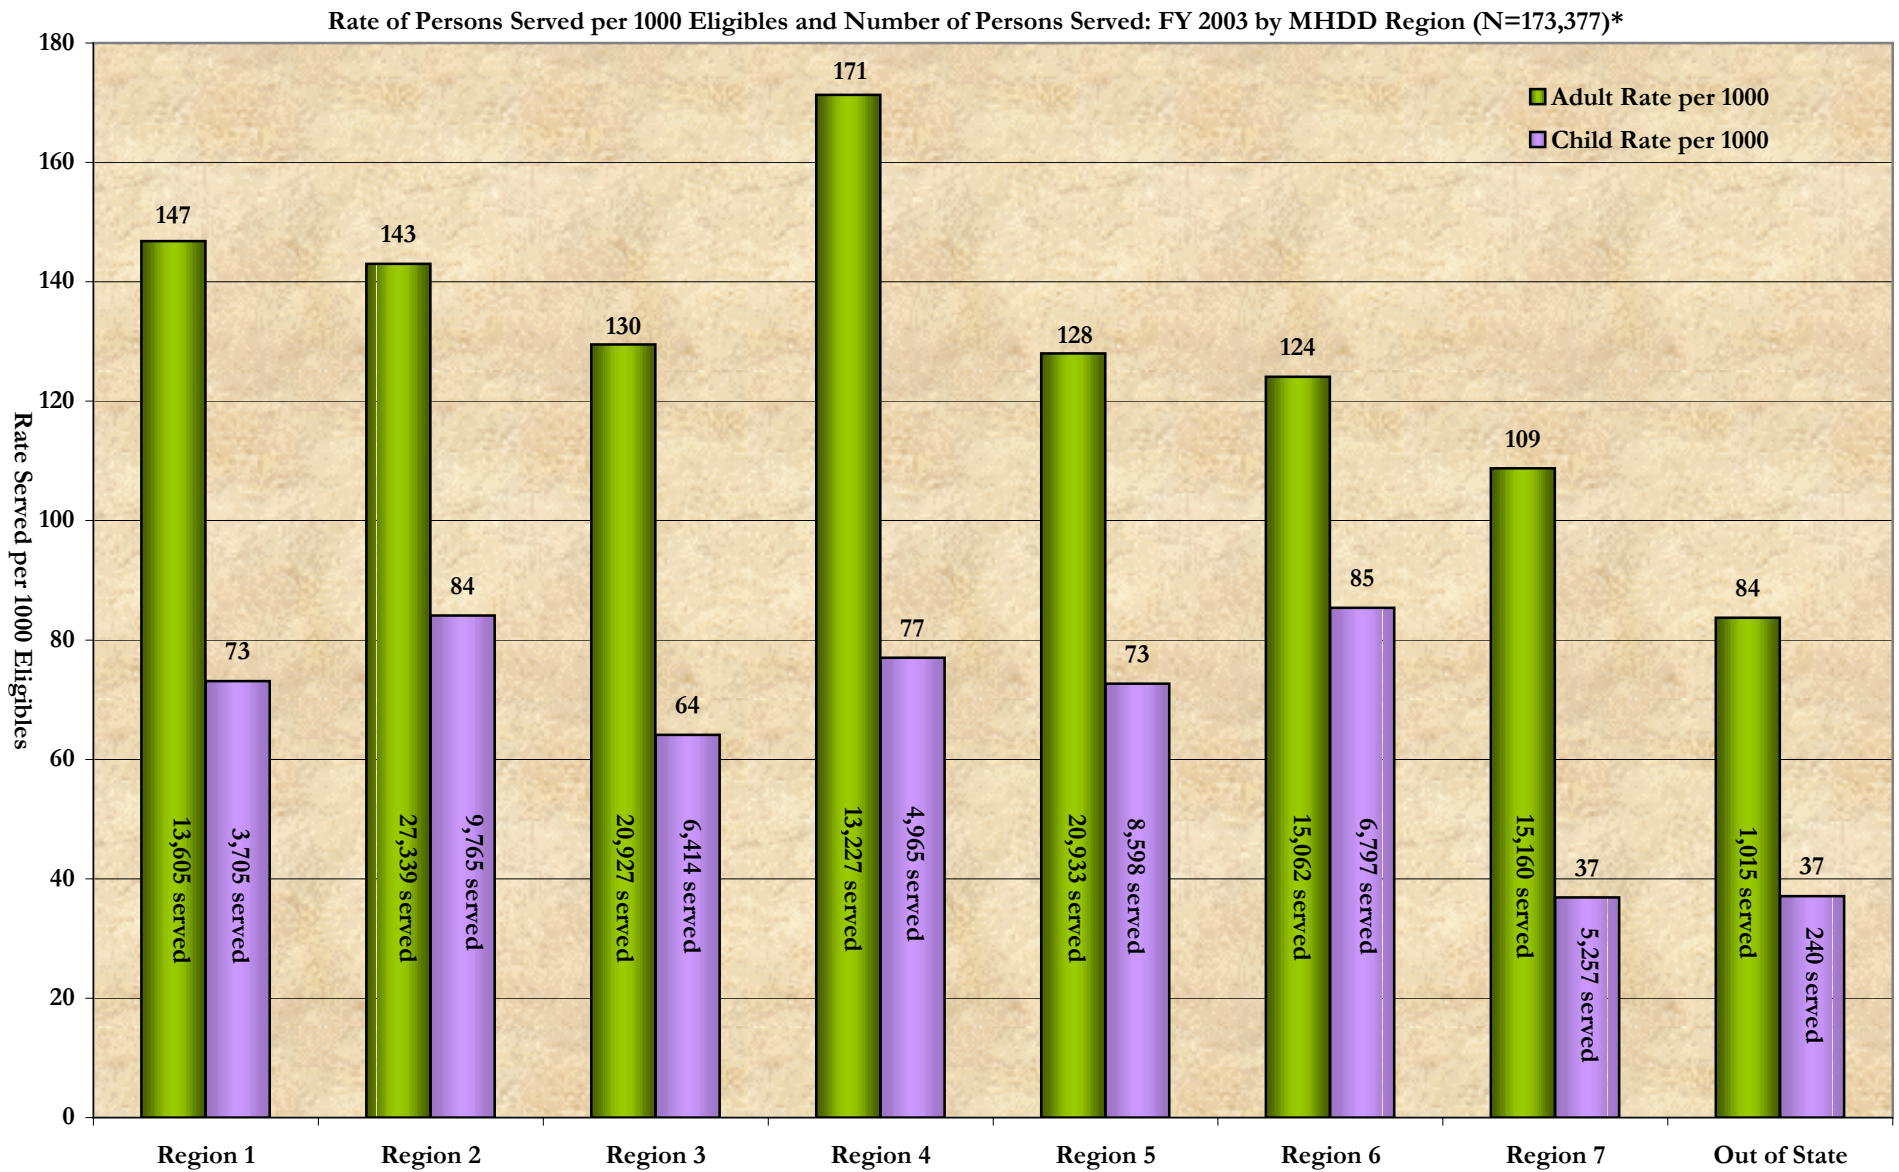

Rate of Persons Served per 1000 Eligibles: Adults and Children

Profile of Persons Served in TN Urban and Rural Areas by Race, FY 2003

Urban/Rural status is based on the geographic residence of the consumer. The sum of the persons served in these charts does not include 1,255 out-of-state consumers and 368 consumers of unknown race or county. Unduplicated persons served refers to the number of unique enrollees who received services through the Partners program 7/1/02 to 6/30/03. Each individual is represented only once, regardless of the number of services received. Rates are determined by dividing the number of persons served in each racial group by the number of eligible enrollees in each group and multiplying by 1000. Due to rounding, the percentages in the pie charts may not add up to 100%.

* The sum of the adults and children served in this chart does not include 337 adults and 31 children of unknown region who are included in the total (N).

Unduplicated persons served refers to the number of unique enrollees who received services through the Partners program 7/1/02 to 6/30/03. Each individual is represented only once, regardless of the number of services received.

Rates are determined by dividing the number of adults/children served in each region by the number of adult/child enrollees in each region and multiplying by 1000.

Transportation	11,351	15.3%	14,422	14.6%	15,127	11.8%	8,785	25.3%	1,883	17.8%	25,795	14.9%

Persons served refers to the number of unique enrollees who received each selected service type 7/1/02 to 6/30/03. The table presents both the number of unduplicated consumers who received each type of service and the percentage of total persons served (N) for each category. For example, of the total males served (74,083), 413 (or 0.6% of the total males served) received 24-hour residential treatment. Of the females served, 140 received this service, or 0.1% of the 98,926 females served.

The sum of the consumers of each service type does not equal the total number of persons served (N) and the sum of percentages does not equal 100%, because a given enrollee may be represented in multiple service types.

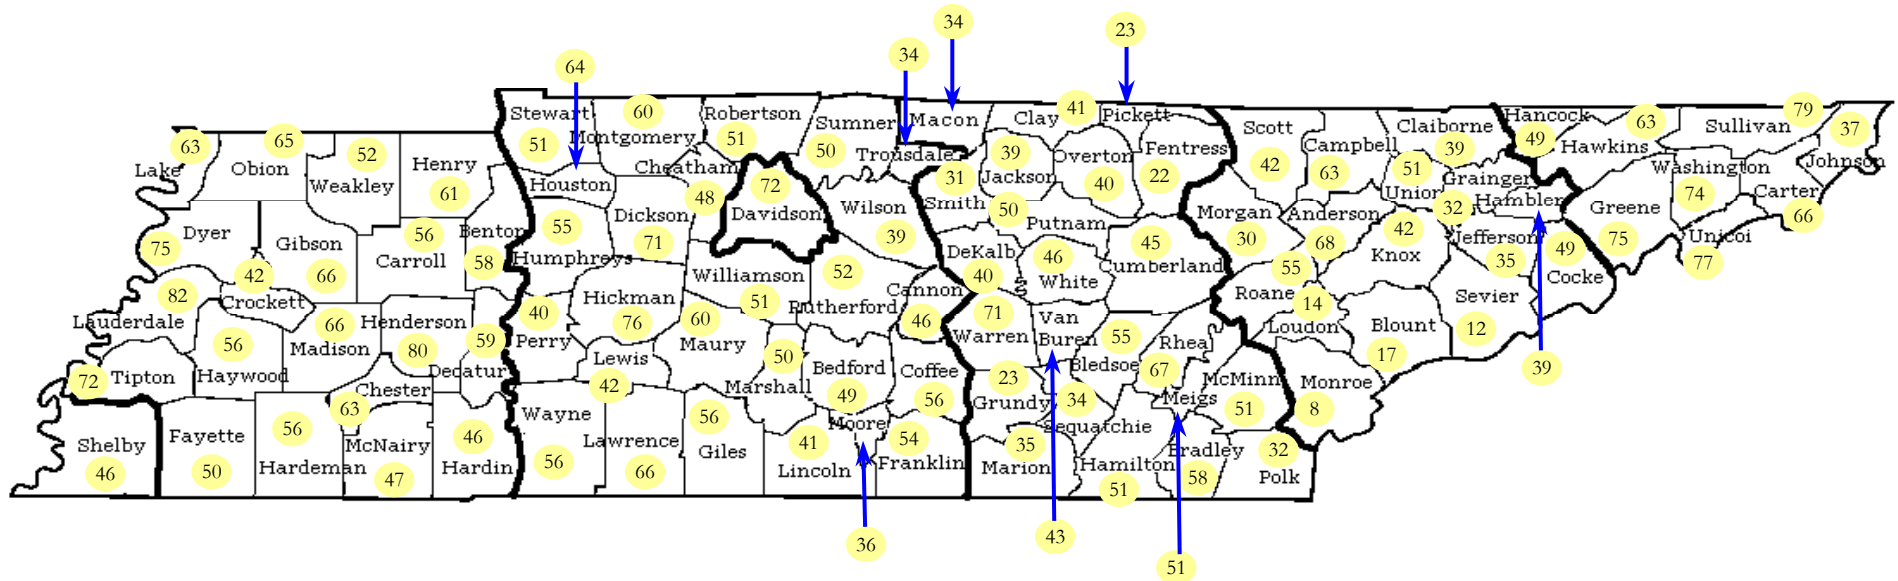

Total persons served (N) includes 368 persons served of unknown sex that are not included in the total males and total females served. For some service types, the sum of the male and female unduplicated consumers does not equal the total unduplicated consumers for that service type, because the total column includes consumers of unknown sex.

Rate of Unduplicated Persons Utilizing Select Service Types per 1000 Eligibles: FY 2003 by County
Case Management Services

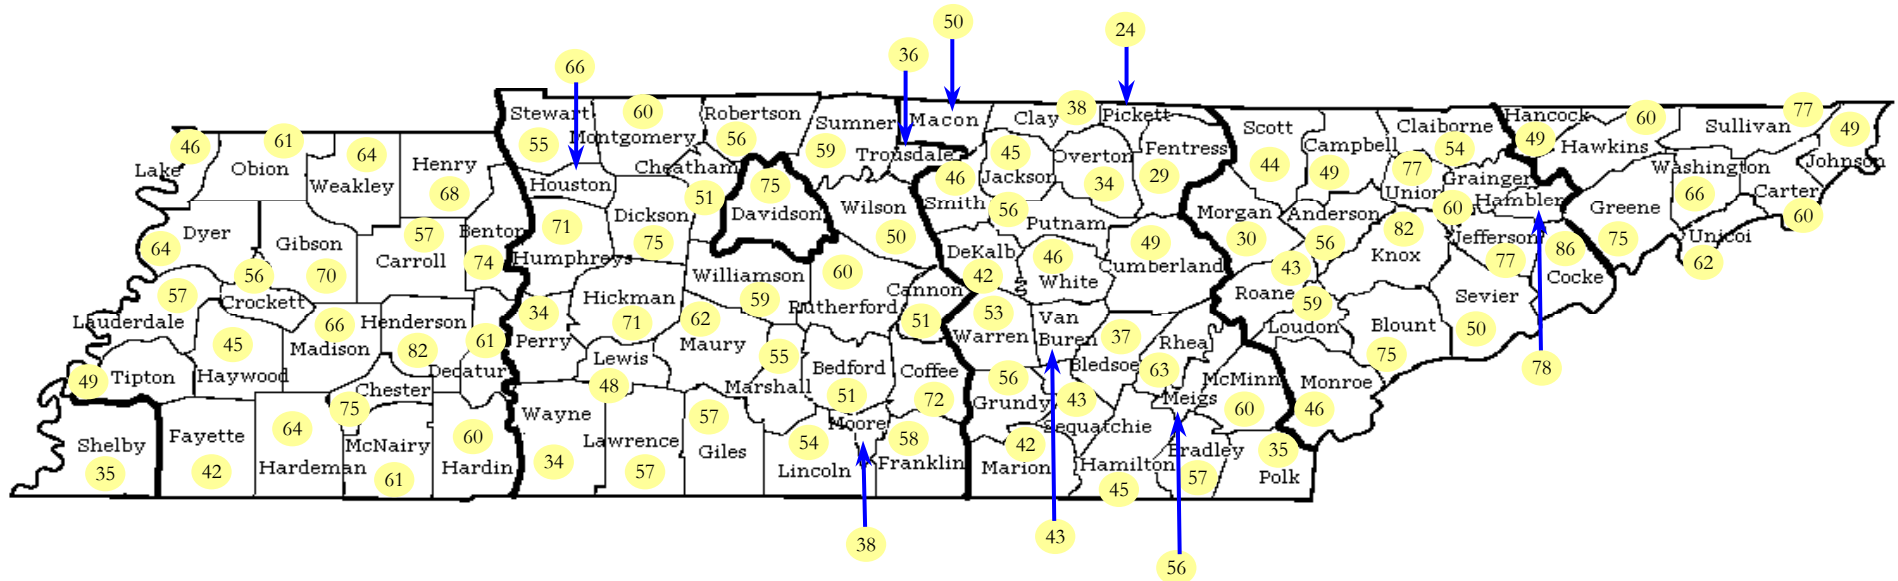

Rates are determined by dividing the number of unduplicated eligibles residing in each county who received case management services by the total number of eligibles in each county and multiplying by 1000.

Rate of Unduplicated Persons Utilizing Select Service Types per 1000 Eligibles: FY 2003 by County
Medication Management Services

Rates are determined by dividing the number of unduplicated eligibles residing in each county who received medication management services by the total number of eligibles in each county and multiplying by 1000.

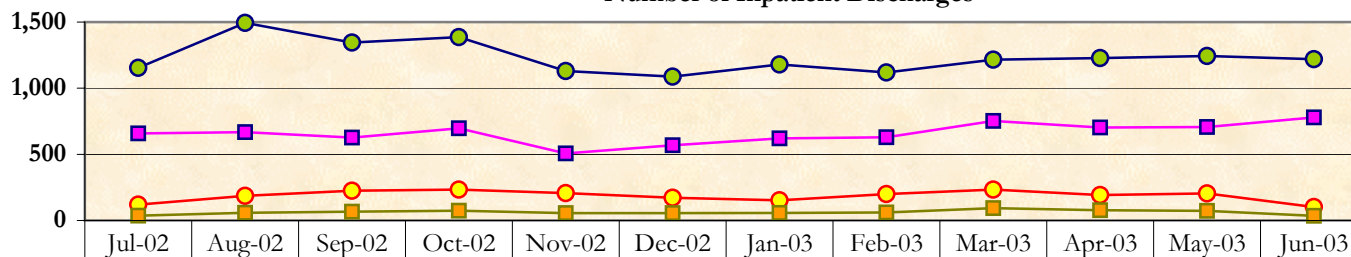

Rate of Unduplicated Persons Utilizing Select Service Types per 1000 Eligibles: FY 2003 by County
Outpatient Therapy Services

Rates are determined by dividing the number of unduplicated eligibles residing in each county who received outpatient therapy services by the total number of eligibles in each county and multiplying by 1000.

Monthly Inpatient Utilization for Adults and Children: FY 2003

Number of Inpatient Discharges

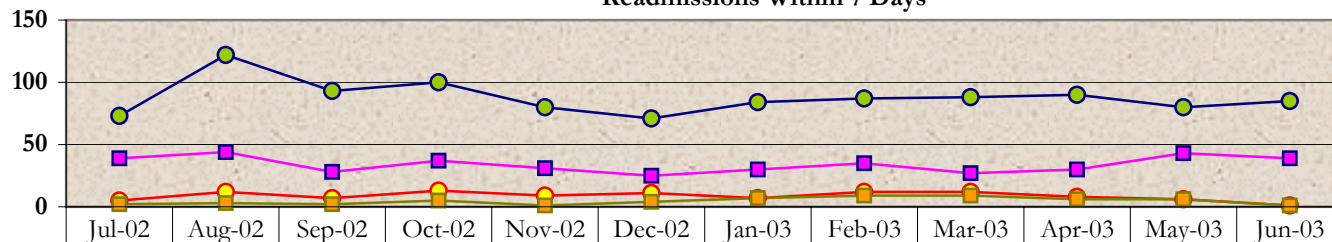

Discharges are defined as inpatient records with bill type 111 or 114 and revenue code 1x4, 1x6, 1x8, 944, or 945.

Readmissions within a given month are defined as those discharges during the month for which the individual had a subsequent admission within 7 days or 8 to 30 days, respectively.

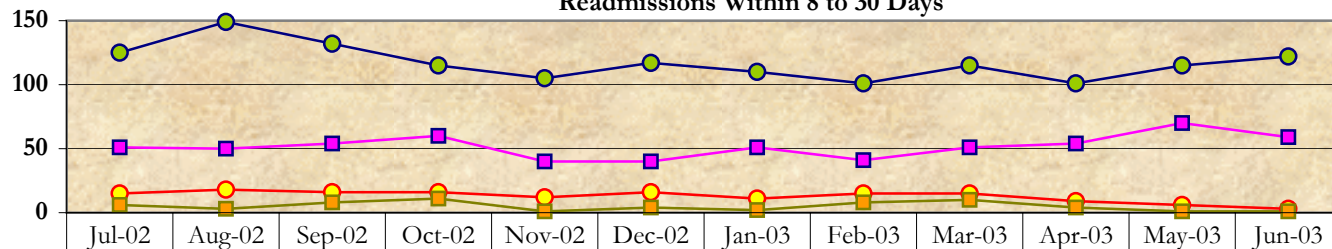

Public facilities are defined as the five Regional Mental Health Institutes (RMHIs): Lakeshore, Memphis, Middle Tennessee, Moccasin Bend, and Western. Private facilities are all other inpatient facilities.

Adults are defined as enrollees age 18 and over as of the date of the service received. Children are defined as enrollees under age 18 as of the date of the service received.

BHO prescriptions refers to the number of prescriptions for "BHO drugs," as determined by the Bureau of TennCare.

These pharmacy data were calculated separately from the service utilization data presented previously, and the degree of overlap is unknown. Consequently, enrollees who received only pharmacy services are not included in the overall persons served.

* Adult total columns include an additional 252 prescriptions for 82 recipients of unknown sex or race. Child total columns include an additional 11 prescriptions for 5 recipients of unknown sex or race. Not included in these tables are an additional 22 prescriptions for 2 recipients of unknown age.

The therapeutic class "Other" includes psychotropic drugs not included in the other classes as well as a variety of other medications used in conjunction with psychotropic drugs to combat side effects.

Profile of SPMI TennCare Eligibles: FY 2003 (N=97,417)*

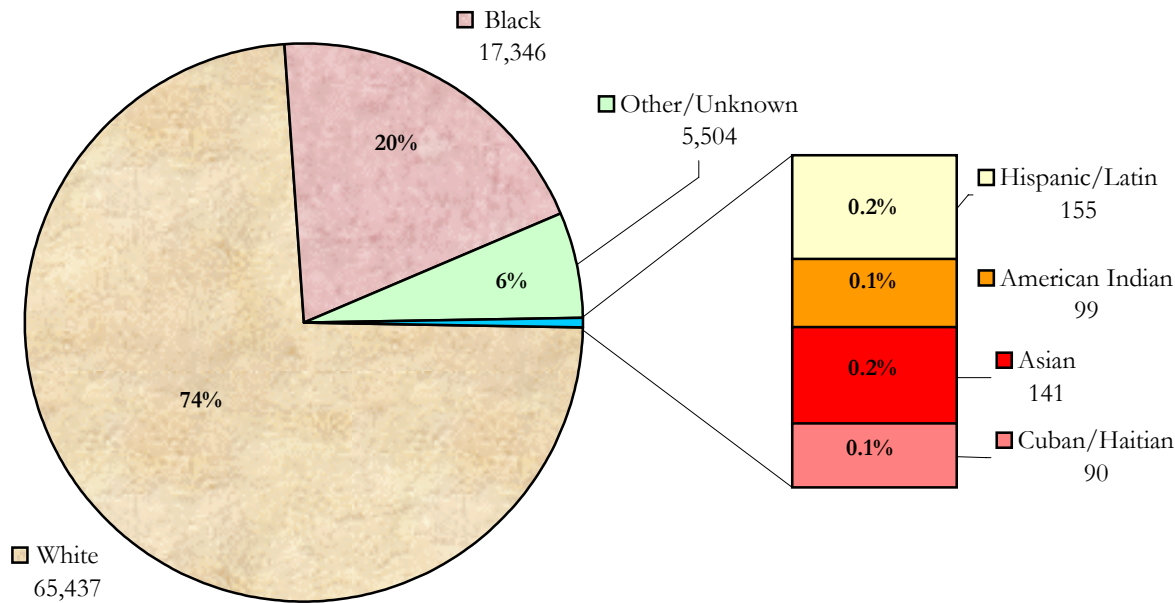

The SPMI population is defined as all Severely or Persistently Mentally Ill adults (a current CRG 1, CRG 2, or CRG 3 assessment). A current assessment is defined as within one year. SPMI Eligibles include all SPMI persons eligible to receive services through the Partners program for some period of time between 7/1/02 and 6/30/03, regardless of length of eligibility period.

* The sum of the eligibles in these charts does not include 353 SPMI eligibles of unknown region who are included in the total (N).

Due to rounding, the percentages in the pie charts may not add up to 100%.

Unduplicated SPMI Population Served in FY 2003 by Race (N=88,772)

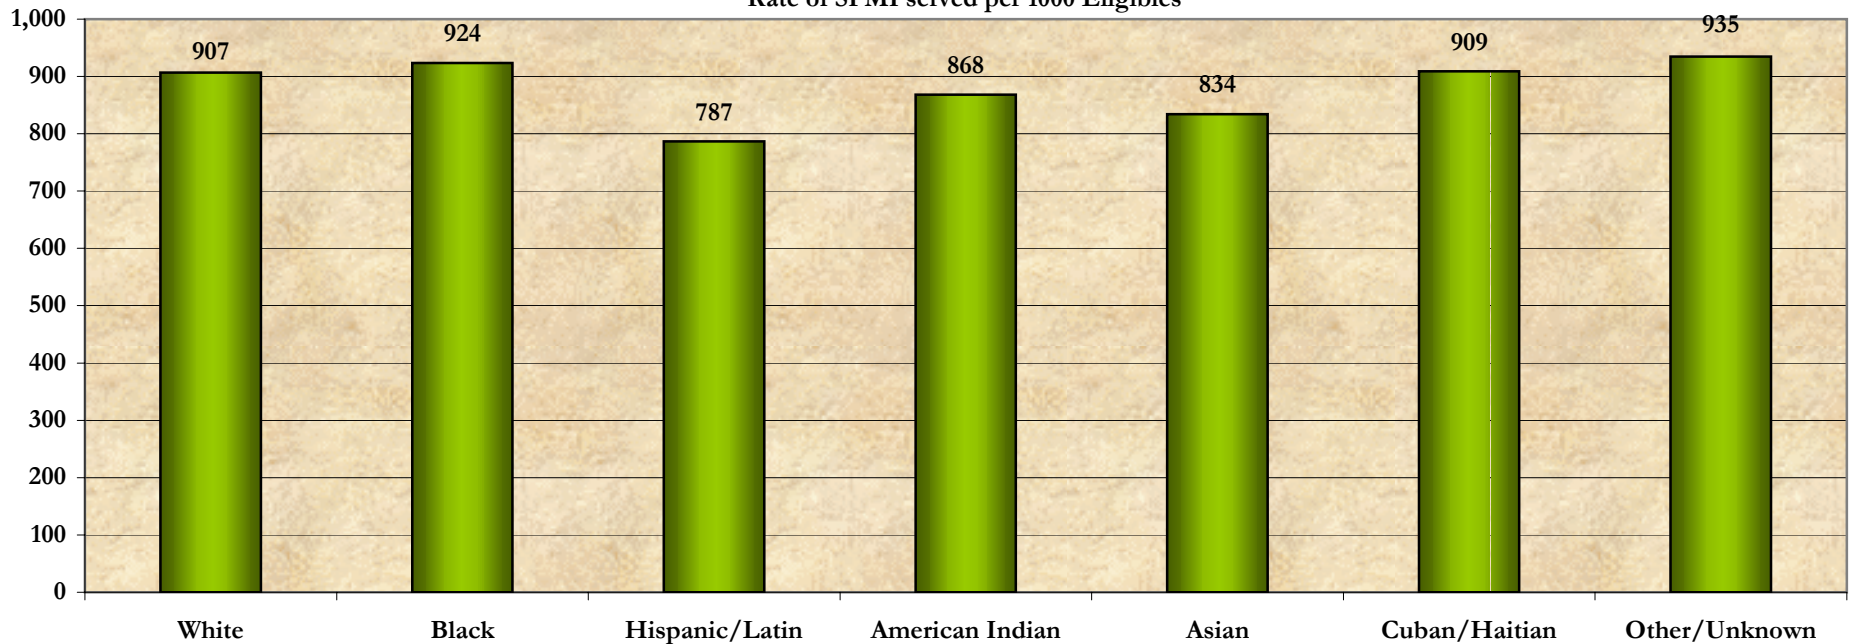

The SPMI population is defined as all Severely or Persistently Mentally Ill adults (a current CRG 1, CRG 2, or CRG 3 assessment). A current assessment is defined as within one year of the date of service received.

Unduplicated SPMI served refers to the number of unique enrollees who received services through the Partners program 7/1/02 to 6/30/03. Each individual is represented only once, regardless of the number of services received.

Rates are determined by dividing the number of SPMI persons served in each racial group by the number of eligible SPMI enrollees in each group and multiplying by 1000.

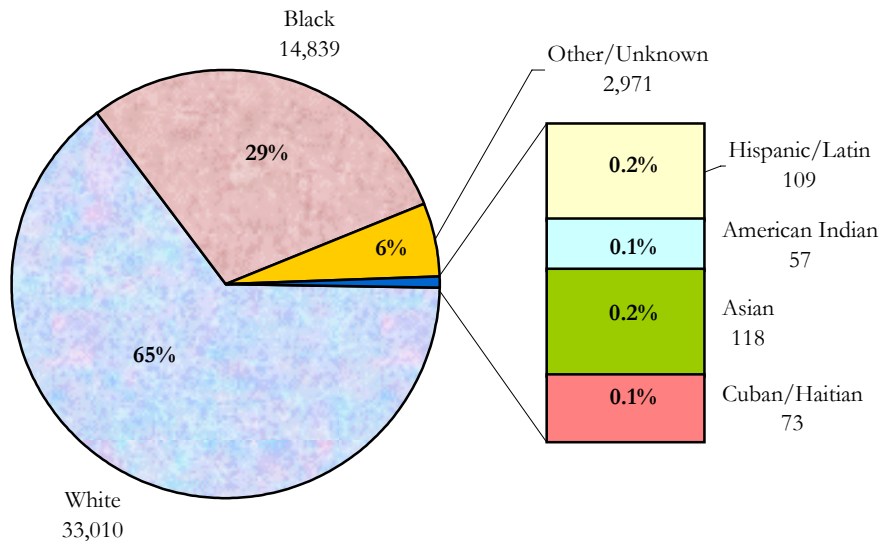

Due to rounding, the percentages in the pie chart may not add up to 100%.

Rate of SPMI served per 1000 Eligibles

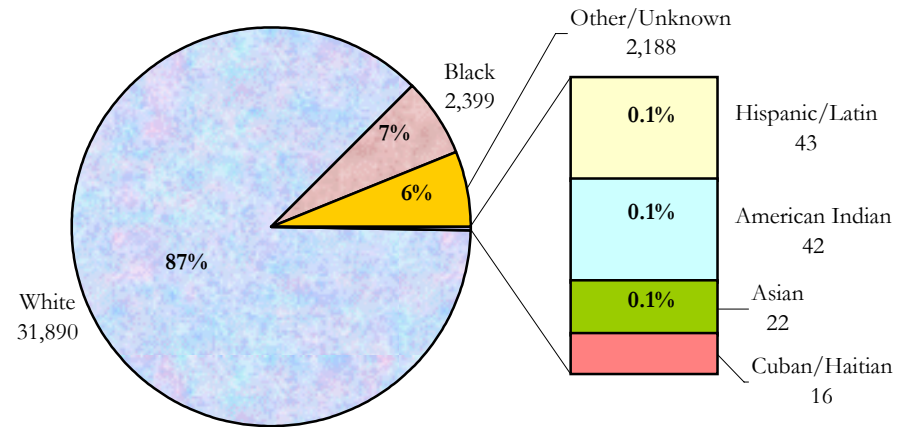

Profile of SPMI Served in TN Urban and Rural Areas by Race: FY 2003

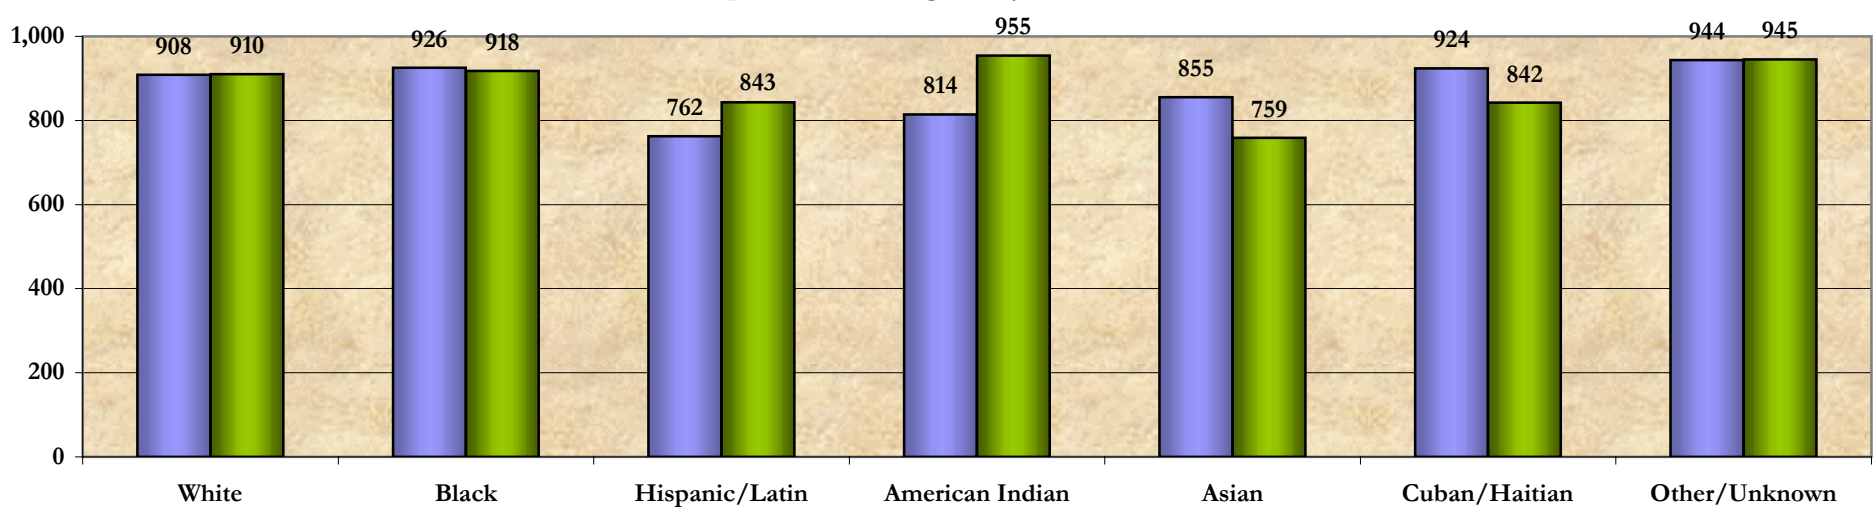

Urban Areas (N=51,177)

Rural Areas (N=36,600)

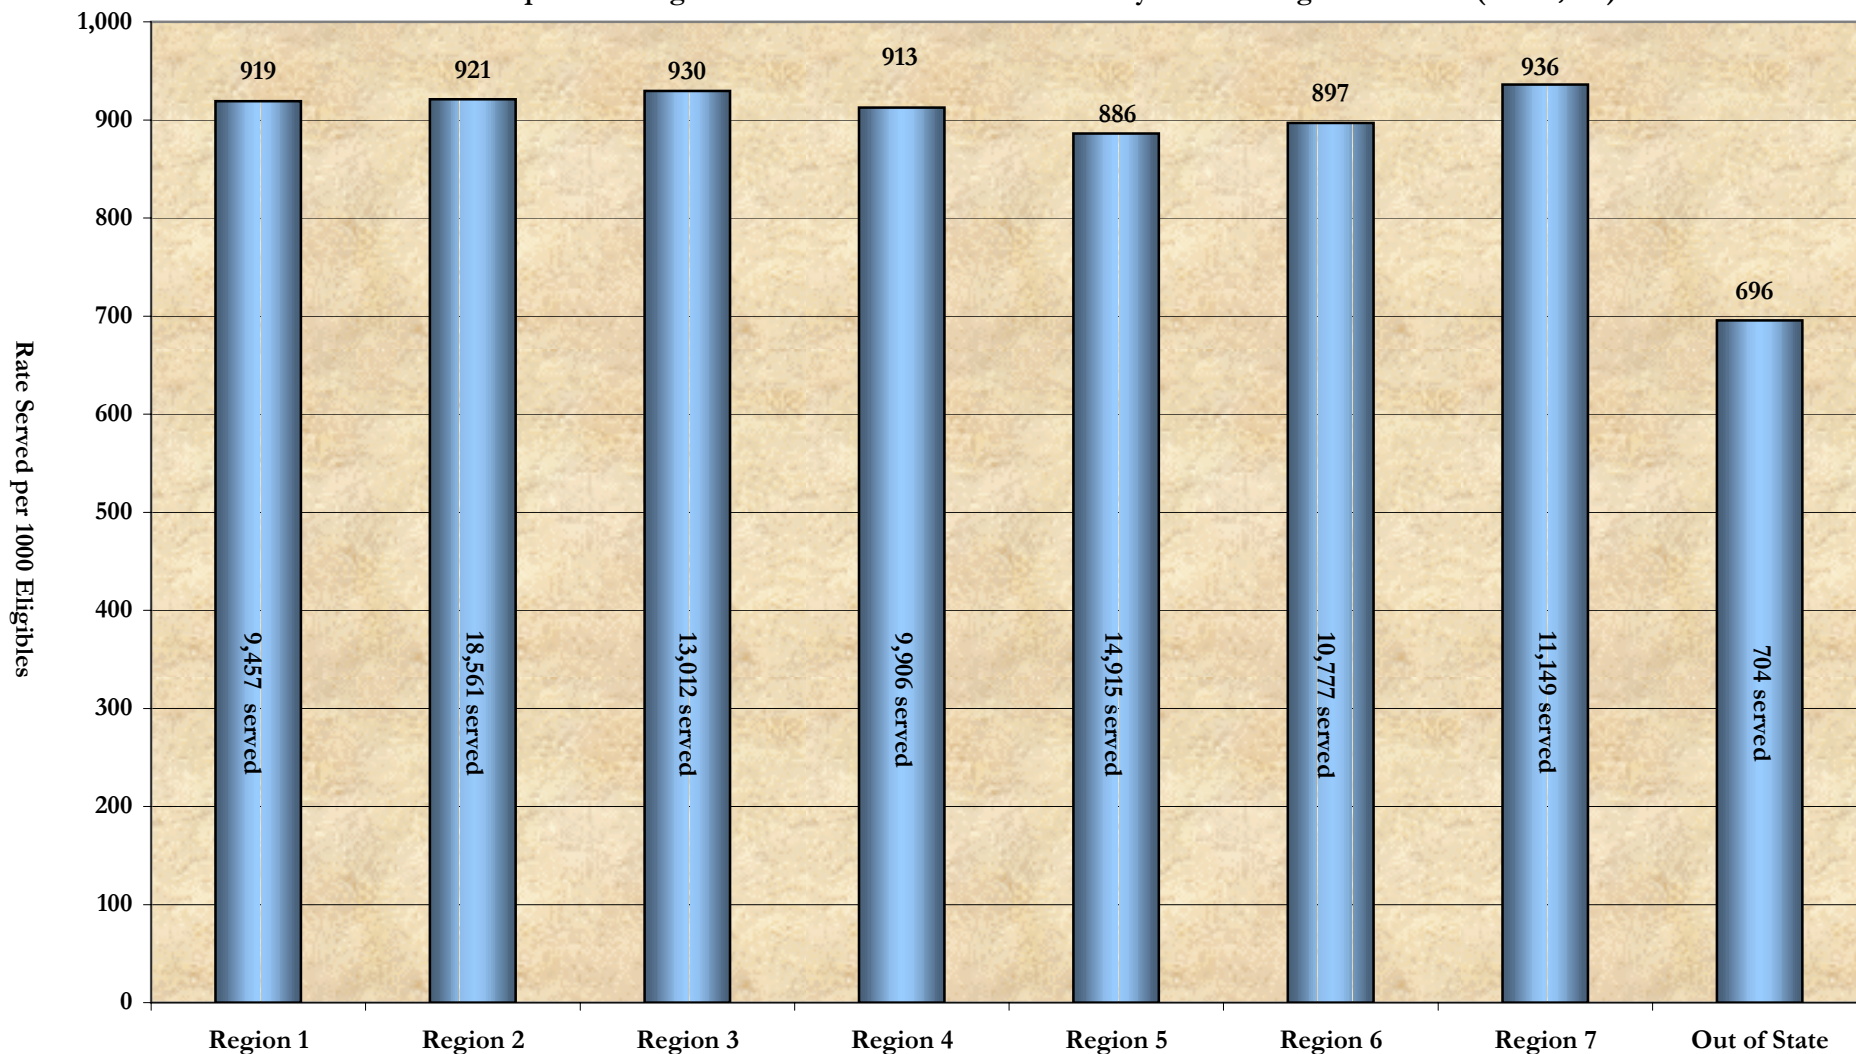

Rate of SPMI Served per 1000 SPMI Eligibles by Race: TN Urban/Rural Areas

Urban/Rural status is based on the geographic residence of the consumer. The sum of the persons served in these charts does not include 704 out-of-state consumers and 291 consumers of unknown race or county. The SPMI population is defined as all Severely or Persistently Mentally Ill adults (a current CRG 1, CRG 2, or CRG 3 assessment). A current assessment is defined as within one year of the date of service received. SPMI served refers to the number of unique enrollees who received services through the Partners program 7/1/02 to 6/30/03. Each individual is represented only once, regardless of the number of services received. Rates are determined by dividing the number of SPMI persons served in each racial group by the number of eligible SPMI enrollees in each group and multiplying by 1000. Due to rounding, the percentages in the pie charts may not add up to 100%.

Rate of SPMI Served per 1000 Eligibles and Number of SPMI Served by MHDD Region: FY 2003 (N=88,772)*

* The sum of the consumers served in this chart does not include 291 consumers of unknown region who are included in the total (N).

SPMI served refers to the number of unique SPMI enrollees who received services through the Partners program 7/1/02 to 6/30/03. Each individual is represented only once, regardless of the number of services received. The SPMI population is defined as all Severely or Persistently Mentally Ill adults (a current CRG 1, CRG 2, or CRG 3 assessment). A current assessment is defined within one year of the date of service.

Rates are determined by dividing the number of persons served in each region by the number of eligible enrollees in each region and multiplying by 1000.

The SPMI population is defined as all Severely or Persistently Mentally Ill adults (a current CRG 1, CRG 2, or CRG 3 assessment). A current assessment is defined as within one year of the date of service received. SPMI served refers to the number of unique enrollees who received each selected service type 7/1/02 to 6/30/03. The table presents both the number of unduplicated SPMI consumers who received each type of service and the percentage of total SPMI persons served (N) for each category. For example, of the total SPMI males served (32,880), 6,491 (or 19.7% of the total SPMI males served) received assessment services. Of the SPMI females served, 11,063 received this service, or 19.9% of the 55,601 SPMI females served.

The sum of the consumers of each service type does not equal the total number of persons served (N) and the sum of percentages does not equal 100%, because a given enrollee may be represented in multiple service types. Total SPMI served (N) includes 291 served of unknown sex that are not included in the total males and total females served. For some service types, the sum of the male and female unduplicated consumers does not equal the total unduplicated consumers for that service type, because the total column includes consumers of unknown sex.

* Psychiatric Diagnostic Interview Exams (CPT code 90801) are reported separately for enrollees up to age 20. Figures in this table for this service reflect utilization by adults aged 18-20.

Monthly Inpatient Utilization for SPMI Enrollees: FY 2003

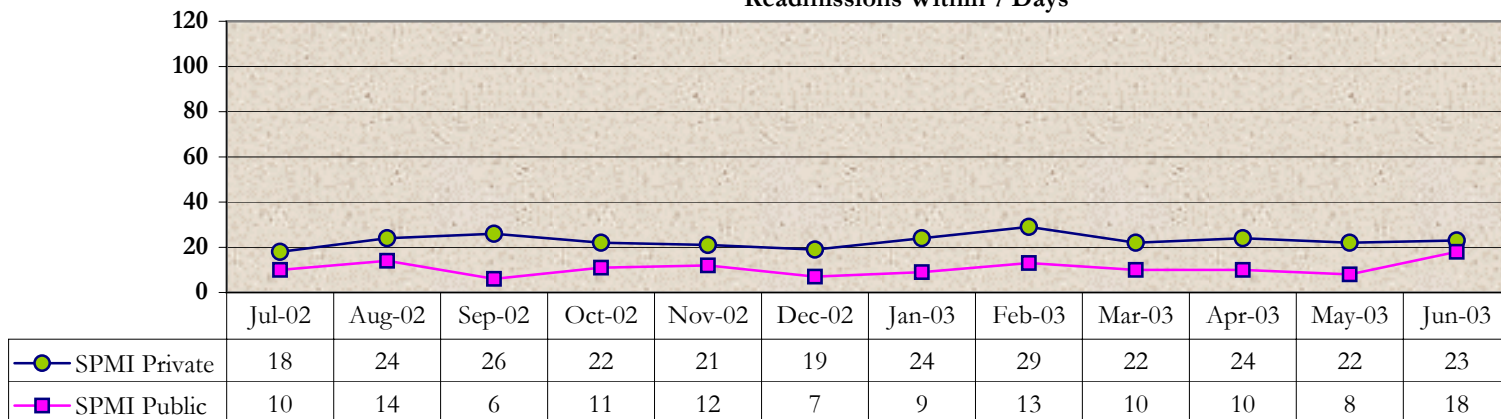

Number of Inpatient Discharges

Discharges are defined as inpatient records with bill type 111 or 114 and revenue code 1x4, 1x6, 1x8, 944, or 945.

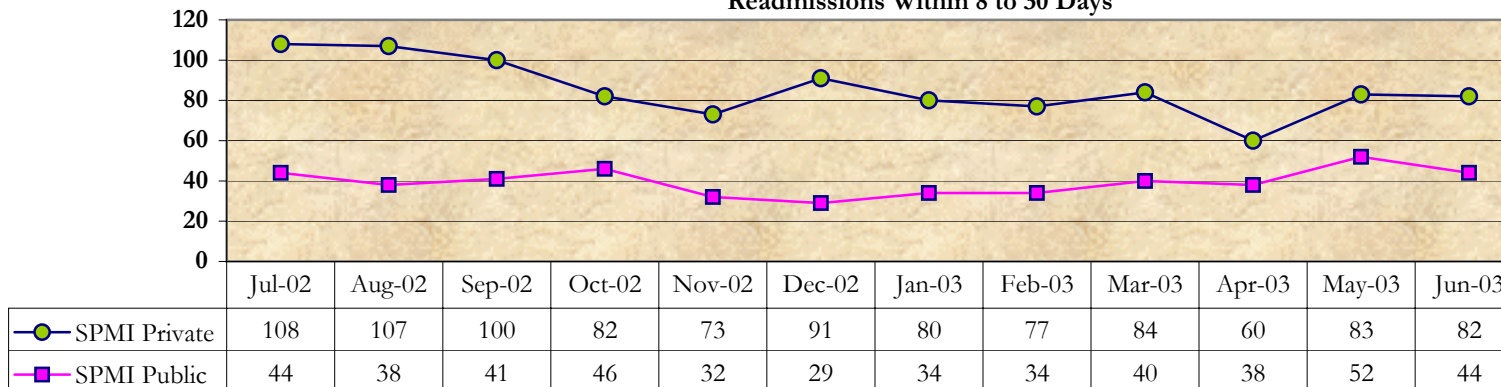

Readmissions within a given month are defined as those discharges during the month for which the individual had a subsequent admission within 7 days or 8 to 30 days, respectively.

Readmissions Within 7 Days

Public facilities are defined as the five Regional Mental Health Institutes (RMHIs): Lakeshore, Memphis, Middle Tennessee, Moccasin Bend, and Western. Private facilities are all other inpatient facilities.

Readmissions Within 8 to 30 Days

The SPMI population is defined as all Severely or Persistently Mentally Ill adults (a current CRG 1, CRG 2, or CRG 3 assessment). A current assessment is defined as within one year of the date

BHO Prescriptions refers to the number of prescriptions for "BHO drugs," as determined by the Bureau of TennCare.

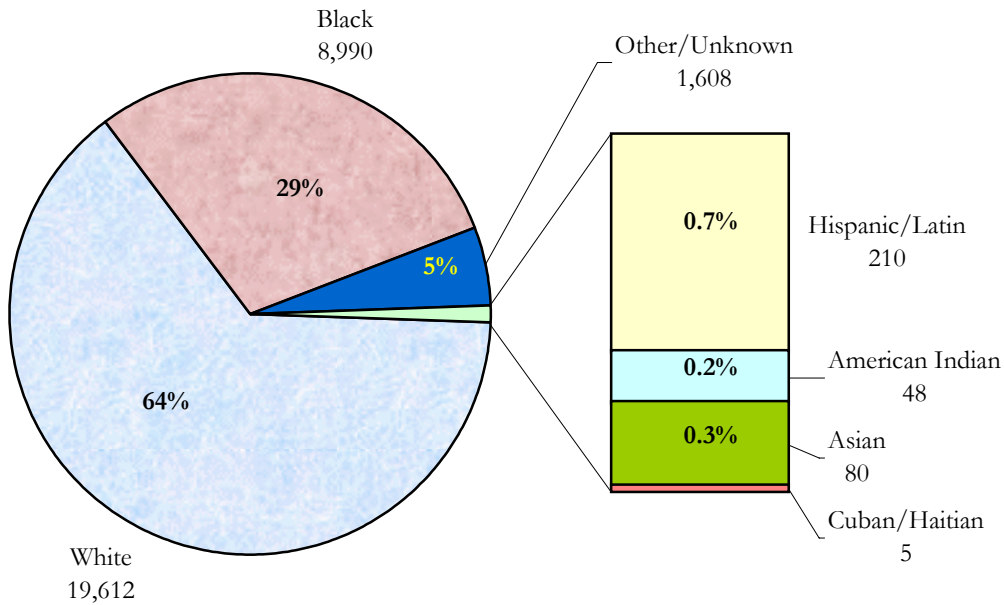

These pharmacy data were calculated separately from the service utilization data presented previously, and the degree of overlap is unknown. Consequently, enrollees who received only pharmacy services are not included in the overall persons served.

* SPMI total columns include an additional 239 prescriptions for 69 recipients of unknown sex or race. The SPMI population is defined as all Severely or Persistently Mentally Ill adults (a current CRG 1, CRG 2, or CRG 3 assessment). A current assessment is defined as within one year of the date of service received. SPMI recipients refers to the number of unique SPMI enrollees who received each prescription type 7/1/02 to 6/30/03.

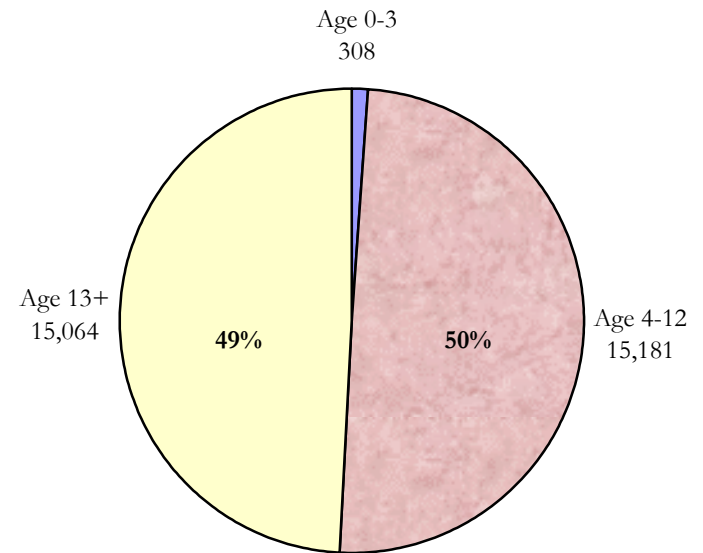

The therapeutic class "Other" includes psychotropic drugs not included in the other classes as well as a variety of other medications used in conjunction with psychotropics to combat side effects.

Profile of SED TennCare Eligibles: FY 2003 (N=30,553)*

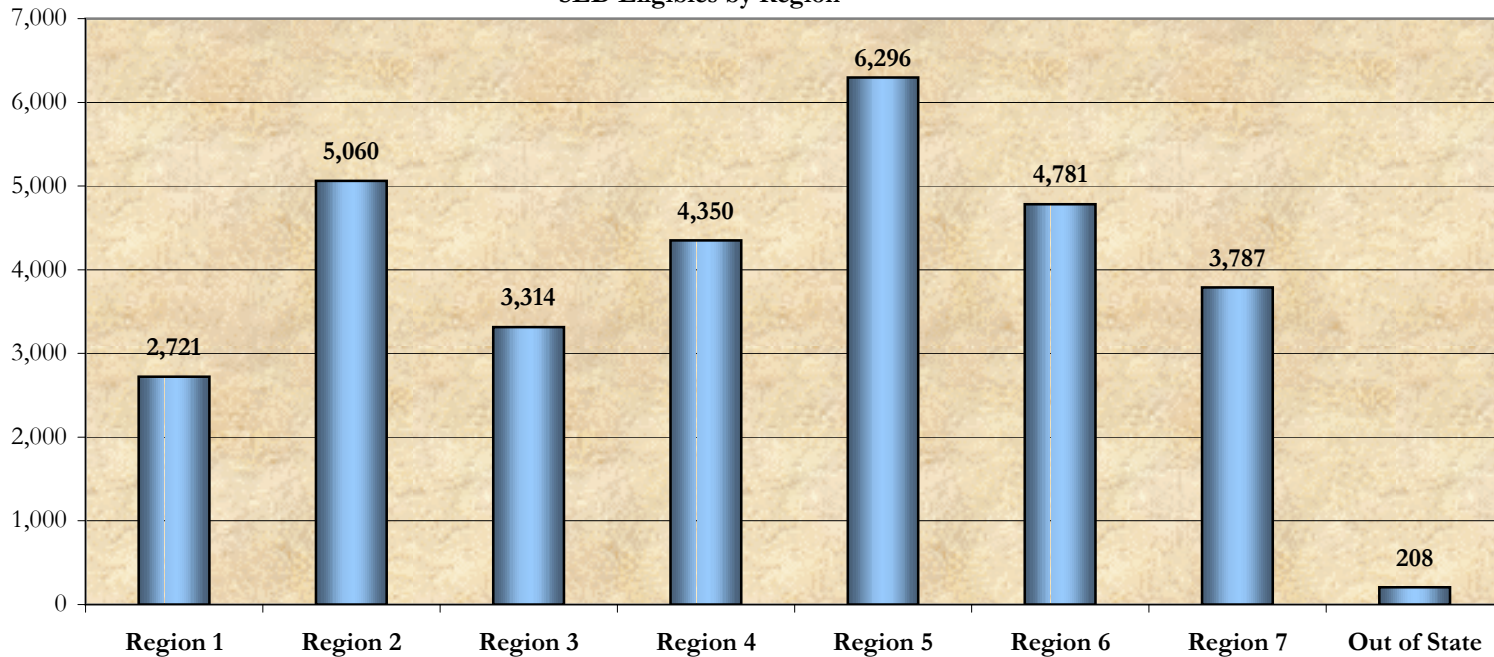

SED Eligibles by Race

SED Eligibles by Age Group

SED Eligibles by Region

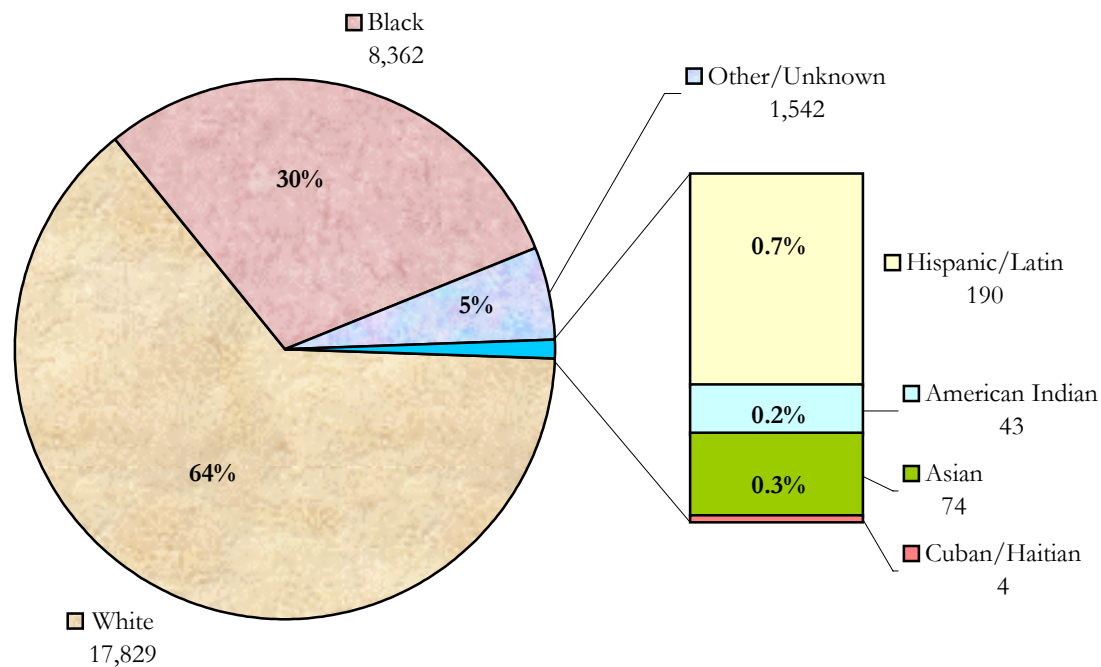

The SED population is defined as all Seriously Emotionally Disturbed children and youth (a current TPG 2 assessment). A current assessment is defined as within one year. SED eligibles include all SED persons eligible to receive services through the Partners program for some period of time between 7/1/02 and 6/30/03, regardless of length of eligibility period.

* The sum of the eligibles in these charts does not include 36 SED eligibles of unknown region who are included in the total (N).

Due to rounding, the percentages in the pie charts may not add up to 100%.

Unduplicated SED Population Served in FY 2003 by Race (N=28,044)

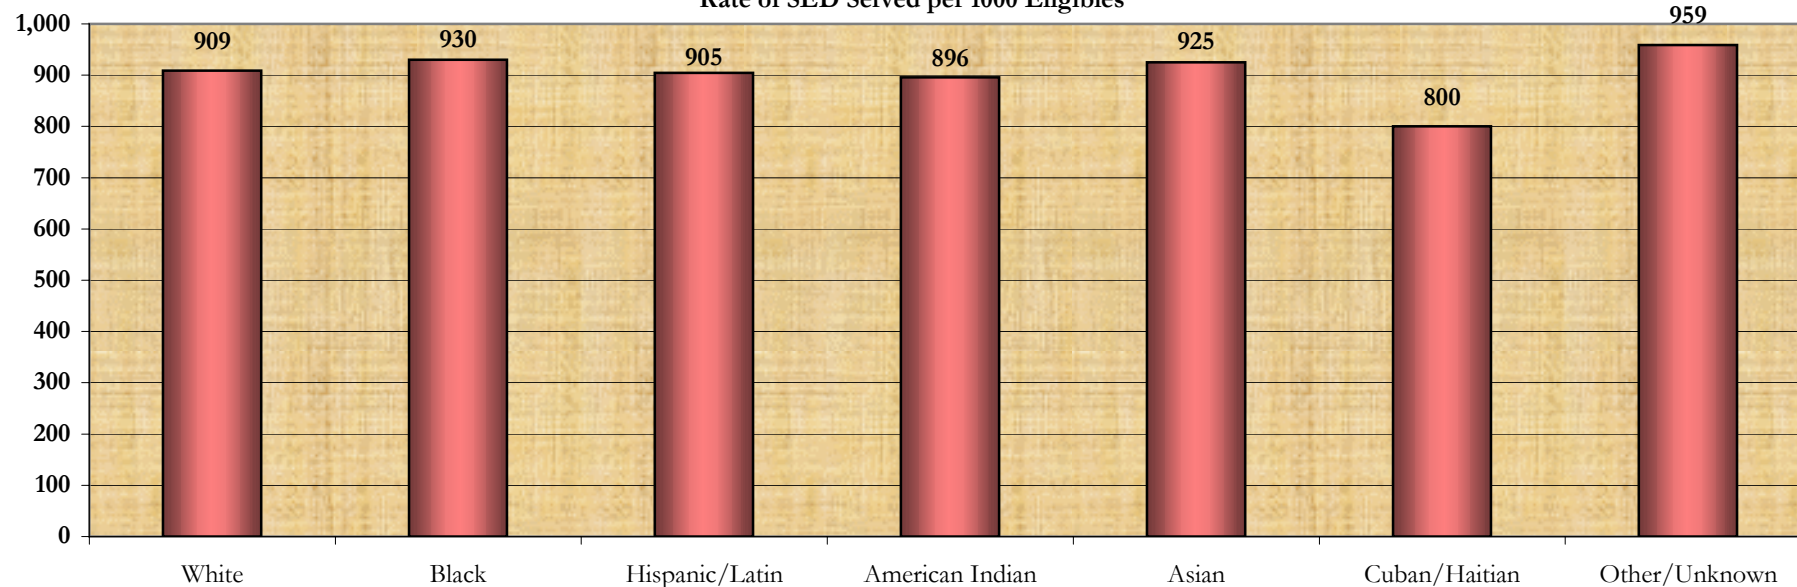

The SED population is defined as all Seriously Emotionally Disturbed children and youth (a current TPG 2 assessment). A current assessment is defined as within one year of the date of service.

Unduplicated SED served refers to the number of unique enrollees who received services through the Partners program 7/1/02 to 6/30/03. Each individual is represented only once, regardless of the number of services received.

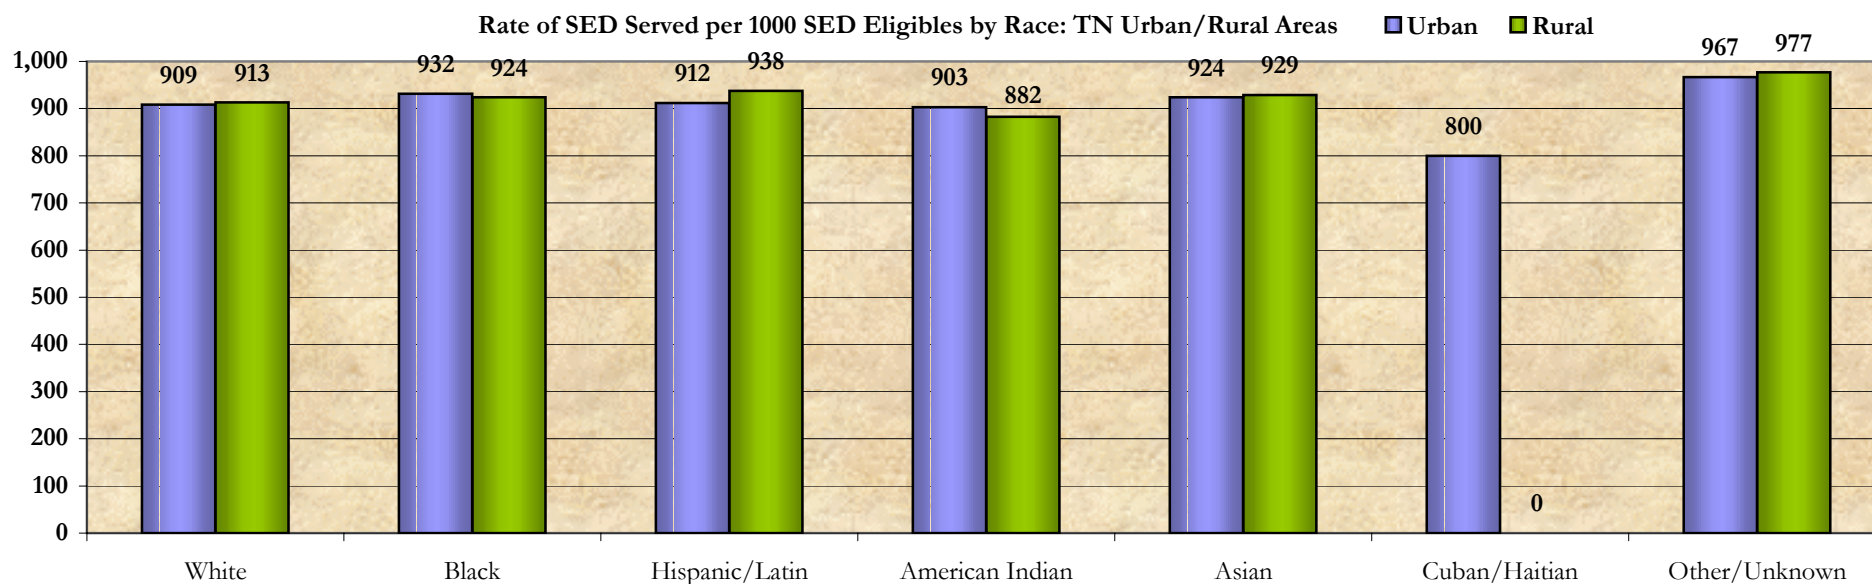

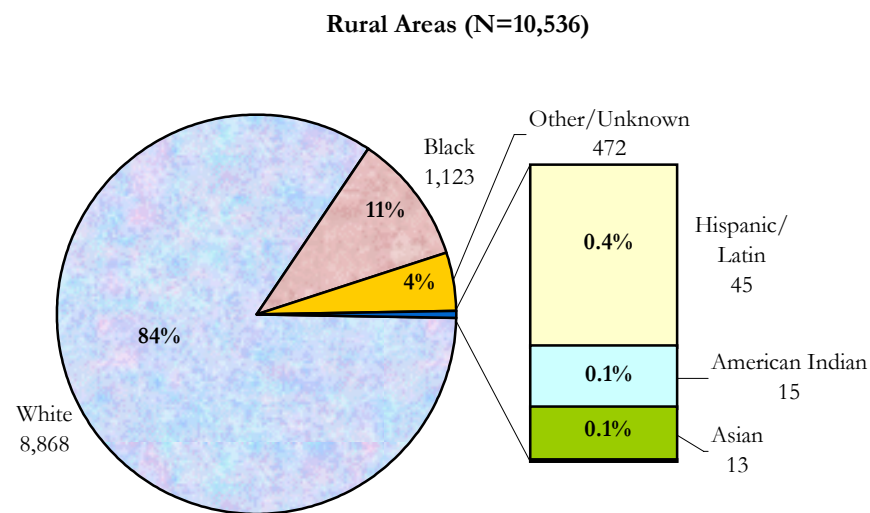

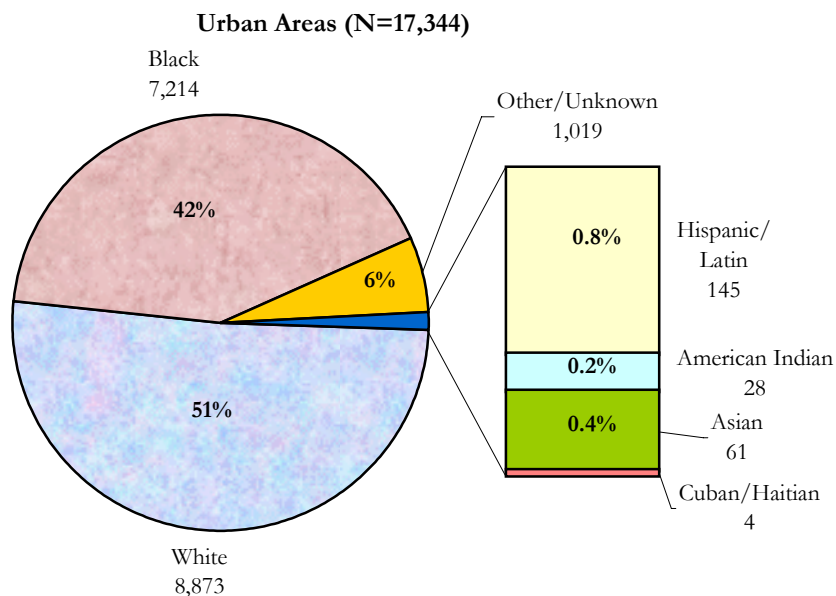

Rates are determined by dividing the number of SED persons served in each racial group by the number of eligible SED enrollees in each group and multiplying by 1000.

Due to rounding, the percentages in the pie chart may not add up to 100%.

Rate of SED Served per 1000 Eligibles

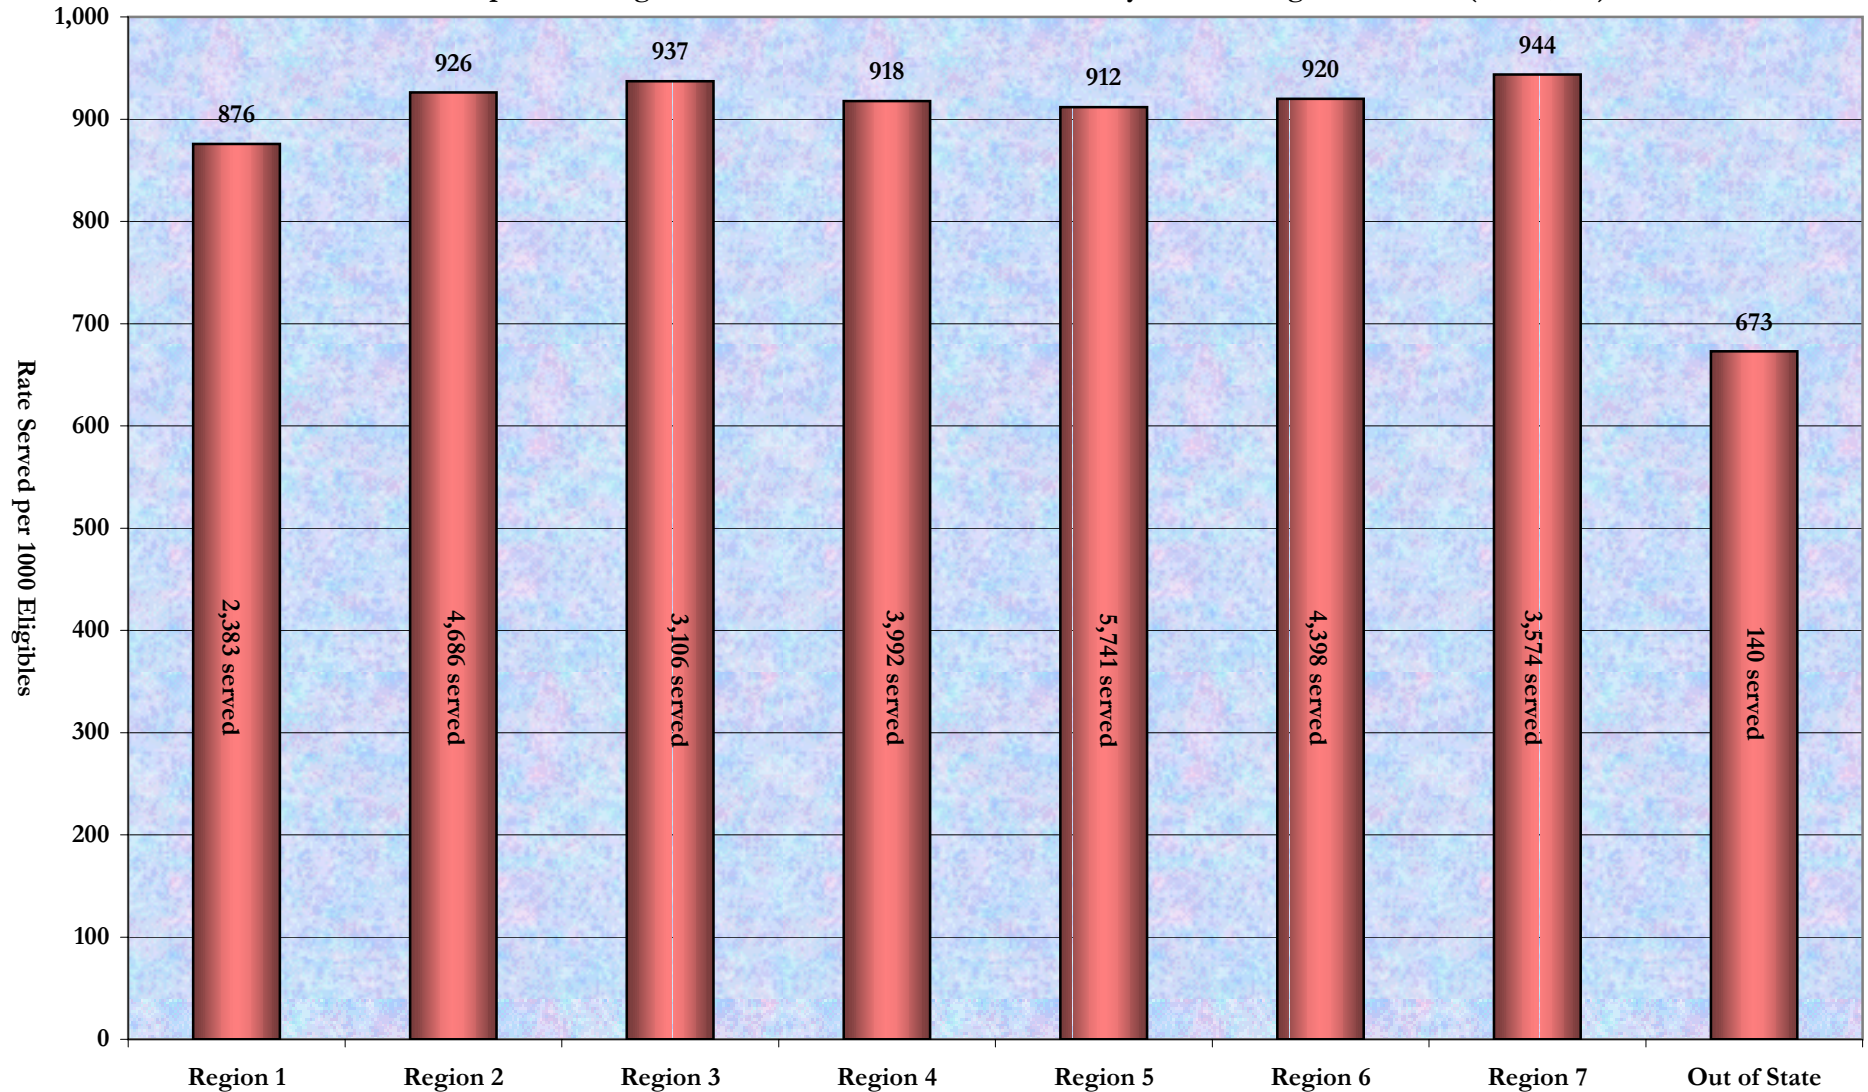

Profile of SED Served in TN Urban and Rural Areas by Race: FY 2003

Urban/Rural status is based on the geographic residence of the consumer. The sum of the persons served in these charts does not include 140 out-of-state consumers and 24 consumers of unknown race or county. The SED population is defined as all Seriously Emotionally Disturbed children and youth (a current TPG 2 assessment). A current assessment is defined as within one year of the date of service received. SED served refers to the number of unique enrollees who received services through the Partners program 7/1/02 to 6/30/03. Each individual is represented only once, regardless of the number of services received. Rates are determined by dividing the number of SED persons served in each racial group by the number of eligible SED enrollees in each group and multiplying by 1000. Due to rounding, the percentages in the pie charts may not add up to 100%.

Rate of SED Served per 1000 Eligibles and Number of Persons Served by MHDD Region: FY 2003 (N=28,044)*

* The sum of the consumers served in this chart does not include 24 consumers of unknown region who are included in the total (N).

SED served refers to the number of unique SED enrollees who received services through the Partners program 7/1/02 to 6/30/03. Each individual is represented only once, regardless of the number of services received. The SED population is defined as all Severely Emotionally Disturbed children and youth (a current TPG 2 assessment). A current assessment is defined as within one year of the date of service received.

Rates are determined by dividing the number of persons served in each region by the number of eligible enrollees in each region and multiplying by 1000.

The SED population is defined as all Seriously Emotionally Disturbed children and youth (a current TPG 2 assessment). A current assessment is defined as within one year of the date of service received. SED served refers to the number of unique enrollees who received each selected service type 7/1/02 to 6/30/03. The table presents both the number of unduplicated SED consumers who received each type of service and the percentage of total SED persons served (N) for each category. For example, of the total SED males served (17,242), 4,097 (or 23.8% of the total SED males served) received assessment services. Of the SED females served, 2,593 received this service, or 24.1% of the 10,778 SED females served.

The sum of the consumers of each service type does not equal the total number of persons served (N) and the sum of percentages does not equal 100%, because a given enrollee may be represented in multiple service types. Total SED served (N) includes 24 served of unknown sex that are not included in the total males and total females served. For some service types, the sum of the male and female unduplicated consumers does not equal the total unduplicated consumers for that service type, because the total column includes consumers of unknown sex.

Monthly Inpatient Utilization for SED Enrollees: FY 2003

Number of Inpatient Discharges

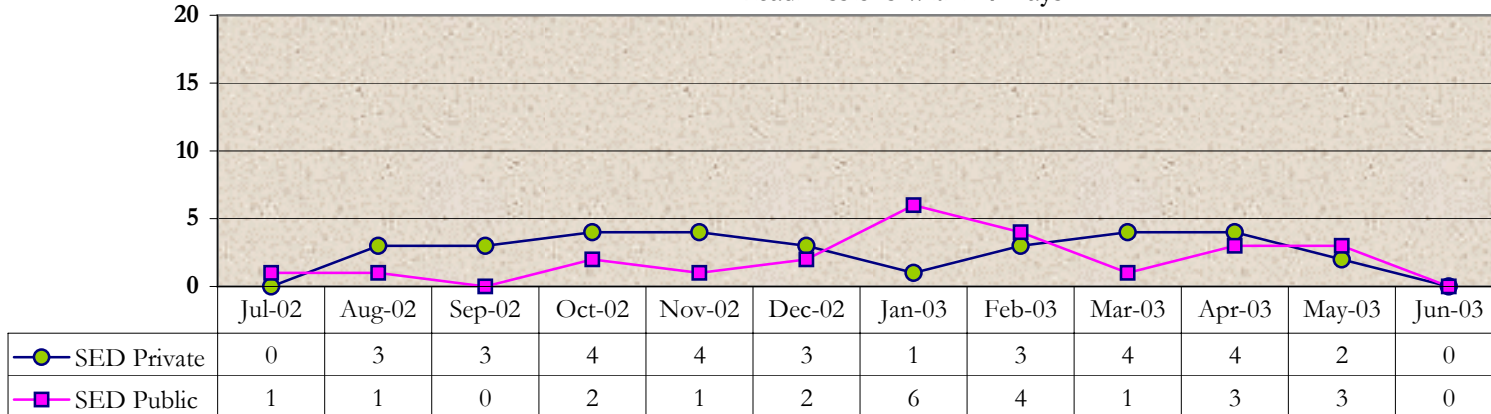

Discharges are defined as inpatient records with bill type 111 or 114 and revenue code 1x4, 1x6, 1x8, 944, or 945.

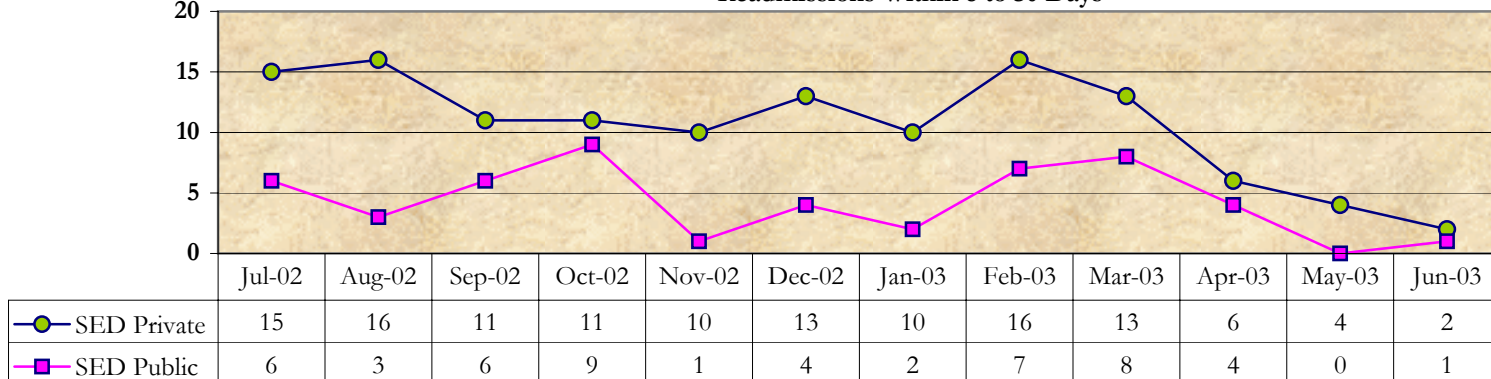

Readmissions within a given month are defined as those discharges during the month for which the individual had a subsequent admission within 7 days or 8 to 30 days, respectively.

Public facilities are defined as the five Regional Mental Health Institutes (RMHIs): Lakeshore, Memphis, Middle Tennessee, Moccasin Bend, and Western. Private facilities are all other inpatient facilities.

Readmissions Within 7 Days

Readmissions Within 8 to 30 Days

The SED population is defined as all Severely Emotionally Disturbed children and youth (a current TPG 2 assessment). A current assessment is defined as within one year of the date of service received.

BHO Prescriptions refers to the number of prescriptions for "BHO drugs," as determined by the Bureau of TennCare.

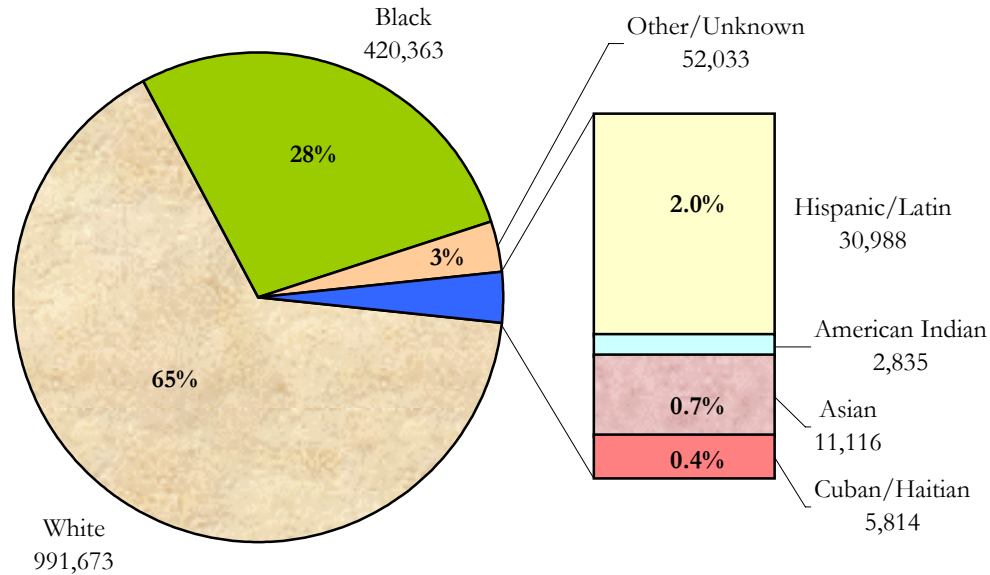

These pharmacy data were calculated separately from the service utilization data presented previously, and the degree of overlap is unknown. Consequently, enrollees who received only pharmacy services are not included in the overall persons served.

* SED total columns include an additional 11 prescriptions for 3 recipients of unknown sex or race. The SED population is defined as all Seriously Emotionally Disturbed children and youth (a current TPG 2 assessment). A current assessment is defined as within one year of the date of service received. SED recipients refers to the number of unique SED enrollees who received each prescription type 7/1/02 to 6/30/03.

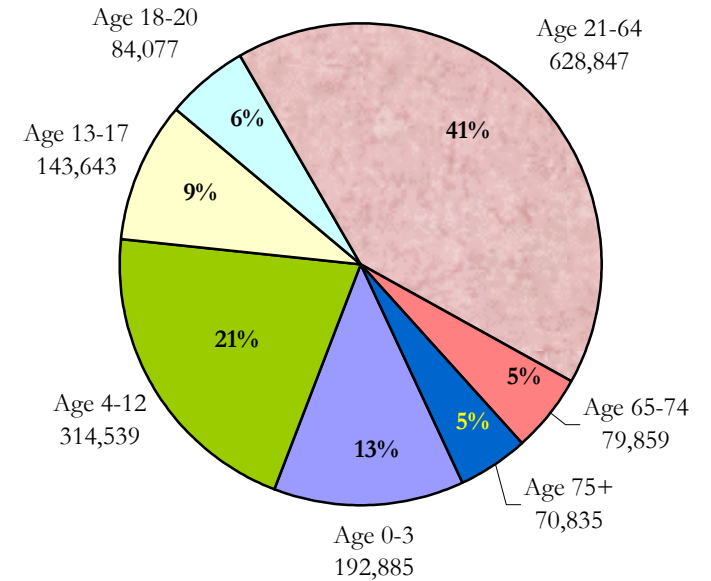

The therapeutic class "Other" includes psychotropic drugs not included in the other classes as well as a variety of other medications used in conjunction with psychotropics to combat side effects.

Profile of Non-Priority TennCare Eligibles: FY 2003 (N=1,514,822)*

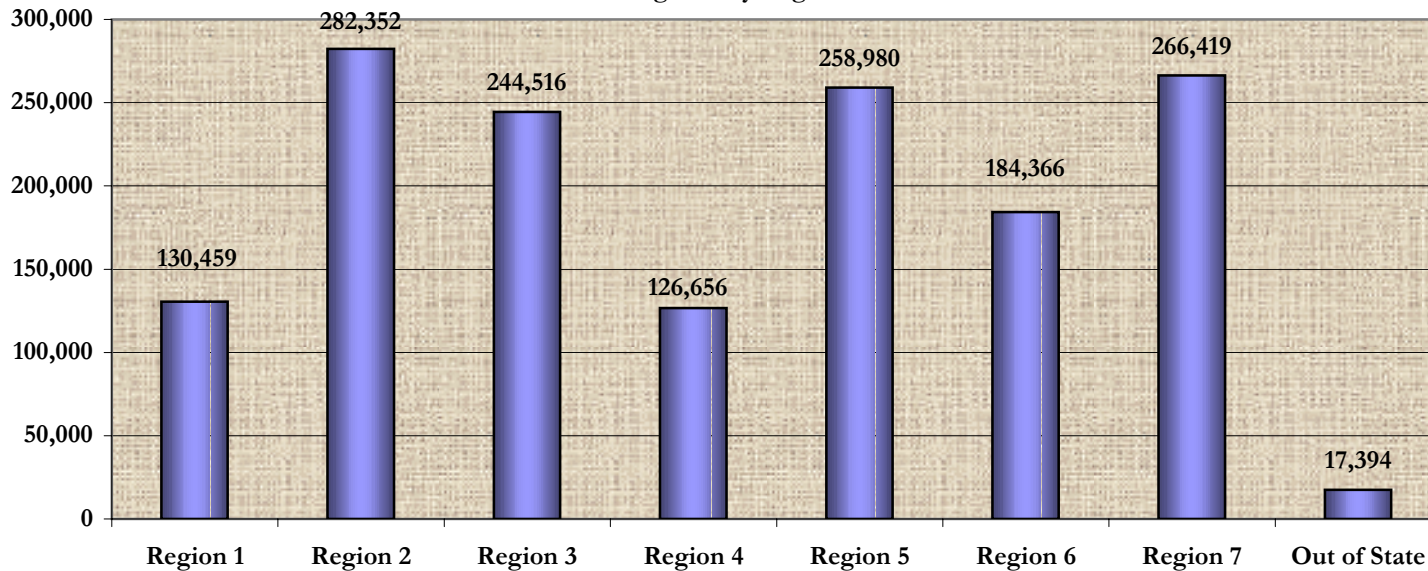

Eligibles by Race

Eligibles by Age Group

Eligibles by Region

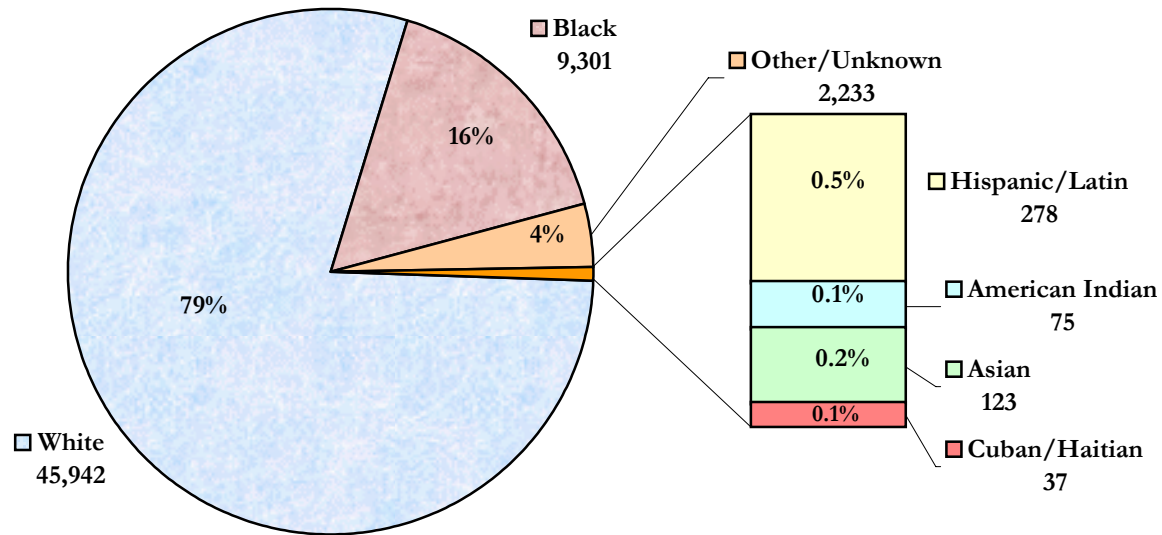

Non-Priority Eligibles are all individuals without SPMI or SED status eligible to receive services through the Partners program for some period of time between 7/1/02 and 6/30/03, regardless of length of eligibility period.

* The sum of the eligibles in these charts does not include 3,680 eligibles of unknown region and 137 eligibles of unknown age who are included in the total (N).

Due to rounding, the percentages in the pie charts may not add up to 100%.

Profile of Unduplicated Non-Priority Persons Served by Race: FY 2003 (N=57,989)

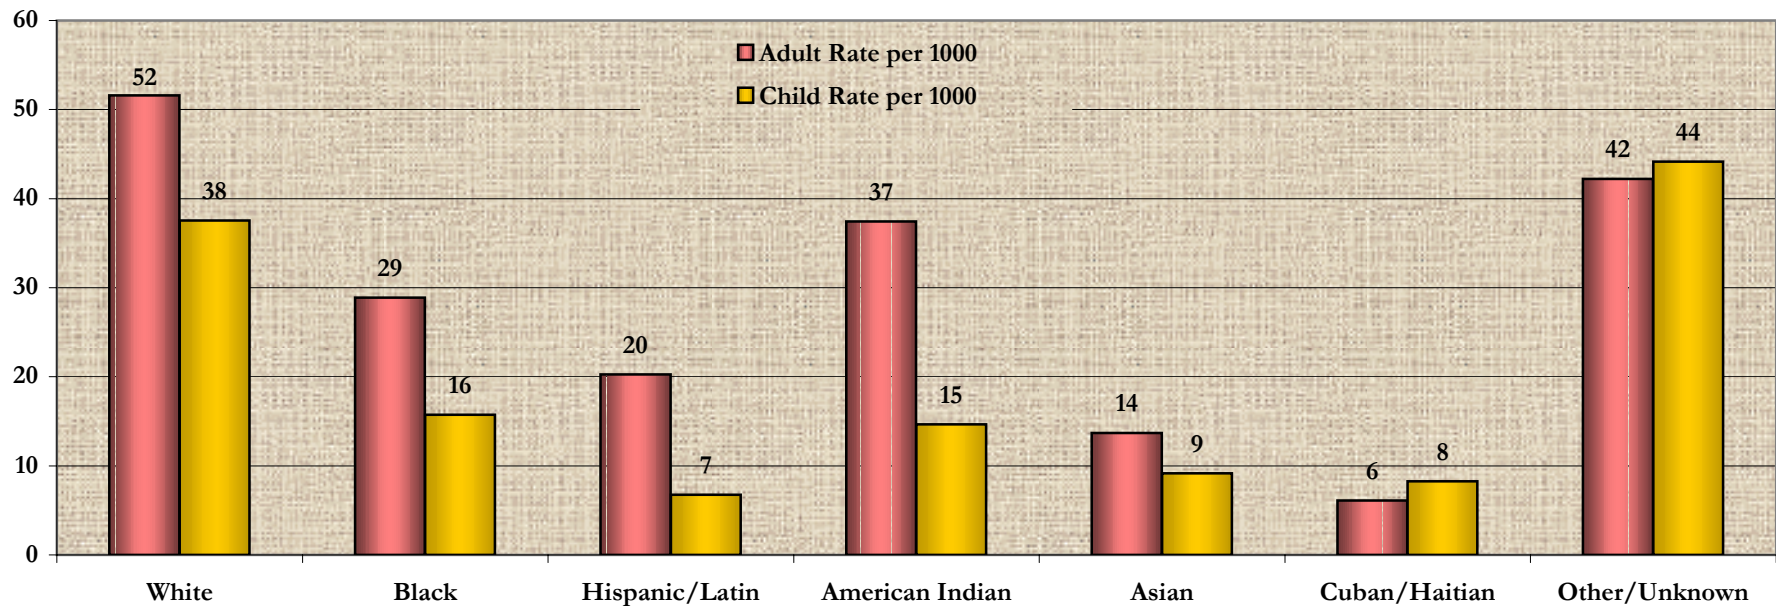

Unduplicated persons served refers to the number of non-priority enrollees who received services through the Partners program 7/1/02 to 6/30/03. Each individual is represented only once, regardless of the number of services received.

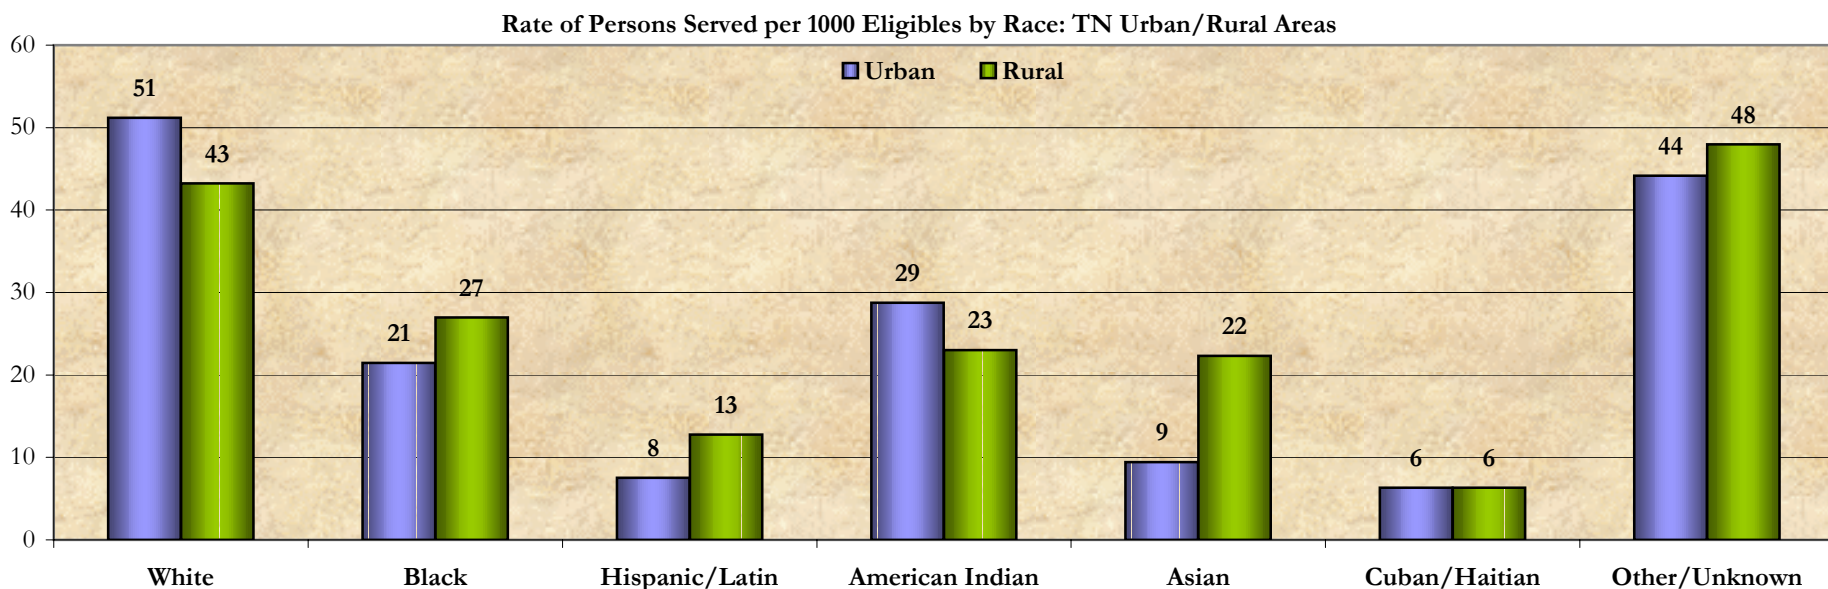

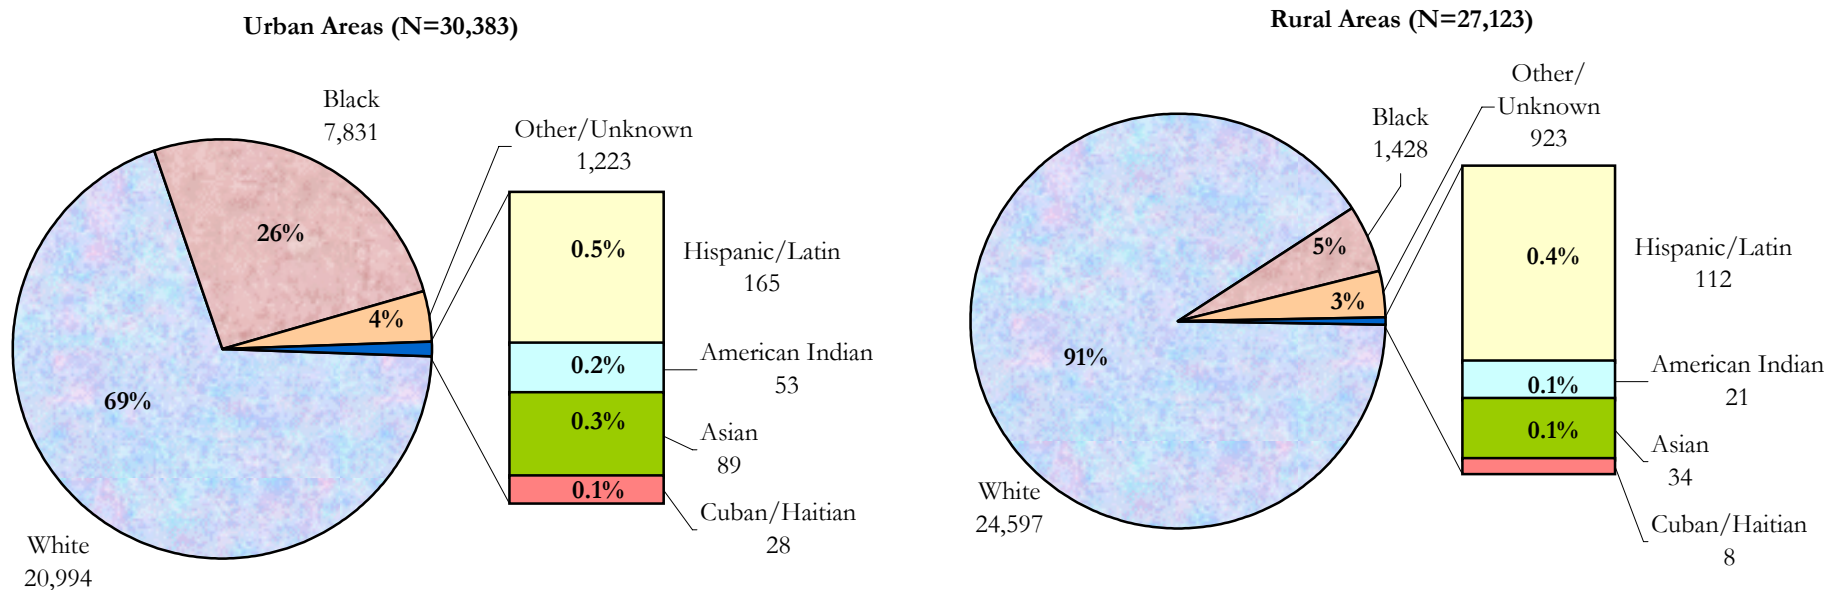

Rates are determined by dividing the number of persons served in each racial group by the number of eligible enrollees in each group and multiplying by 1000.

Due to rounding, the percentages in the pie chart may not add up to 100%.

Rate of Non-Priority Persons Served per 1000 Eligibles: Adults and Children

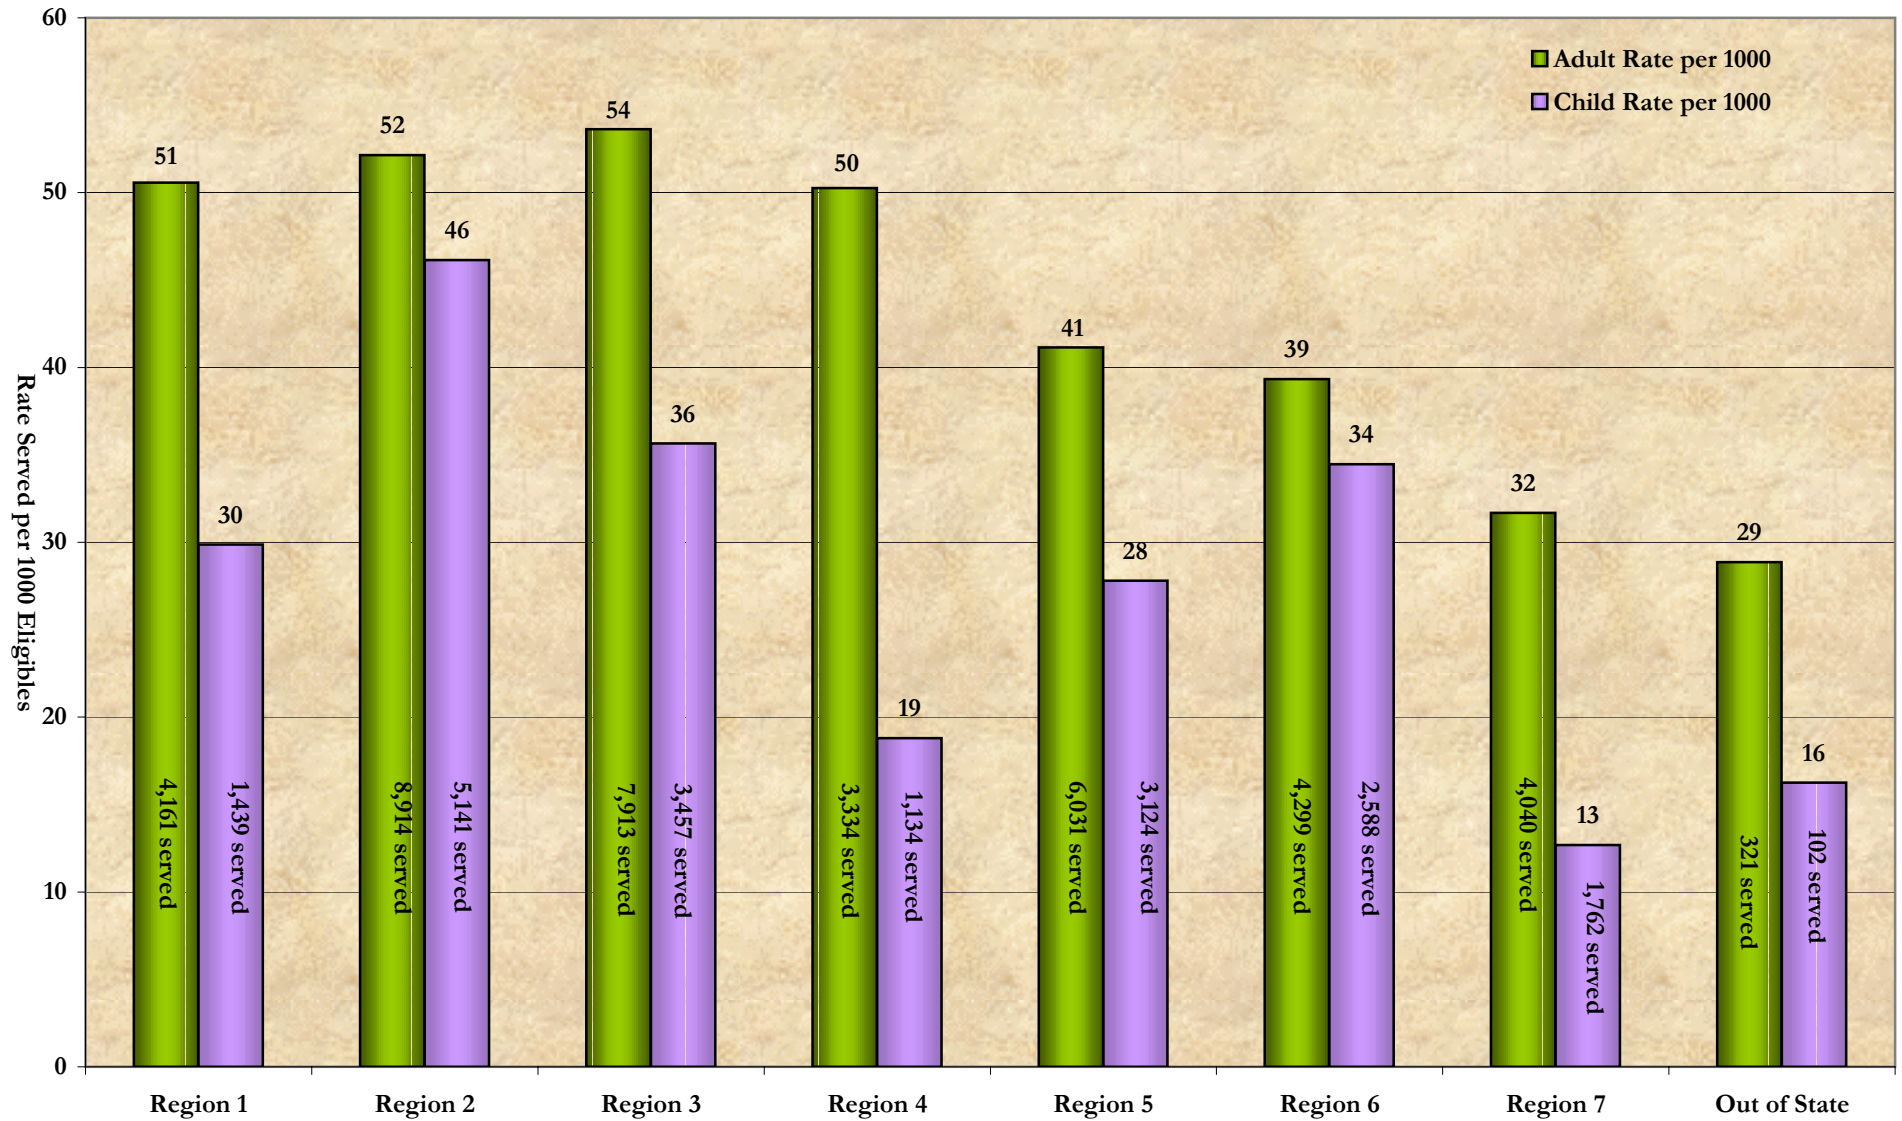

Profile of Non-Priority Persons Served in TN Urban and Rural Areas by Race, FY 2003

Urban/Rural status is based on the geographic residence of the consumer. The sum of the persons served in these charts does not include 426 out-of-state consumers and 57 consumers of unknown race or county. Unduplicated persons served refers to the number of non-priority enrollees who received services through the Partners program 7/1/02 to 6/30/03. Each individual is represented only once, regardless of the number of services received. Rates are determined by dividing the number of persons served in each racial group by the number of eligible enrollees in each group and multiplying by 1000. Due to rounding, the percentages in the pie charts may not add up to 100%.

Rate of Non-Priority Persons Served per 1000 Eligibles and Number of Persons Served: FY 2003 by MHDD Region (N=57,989)*

* The sum of the adults and children served in this chart does not include 229 consumers of unknown age or region who are included in the total (N).

Unduplicated persons served refers to the number of non-priority enrollees who received services through the Partners program 7/1/02 to 6/30/03. Each individual is represented only once, regardless of the number of services received.

Rates are determined by dividing the number of non-priority adults/children served in each region by the number of non-priority adult/child enrollees in each region and multiplying by 1000.

Non-Priority Persons Served in FY 2003 by Select Types of Service, by Sex and Race

Service	Male (N=24,644)		Female (N=33,288)		White (N=45,942)		Black (N=9,301)		Other/Unknown (N=2,746)		Total (N=57,989)

Persons served refers to the number of non-priority enrollees who received each selected service type 7/1/02 to 6/30/03. The table presents both the number of unduplicated non-priority consumers who received each type of service and the percentage of total non-priority persons served (N) for each category. For example, of the total non-priority males served (24,644), 102 (or 0.4% of the total non-priority males served) received 24-hour residential treatment. Of the non-priority females served, 23 received this service, or 0.1% of the 33,288 females served.

The sum of the consumers of each service type does not equal the total number of persons served (N) and the sum of percentages does not equal 100%, because a given enrollee may be represented in multiple service types.

Total persons served (N) includes 57 persons served of unknown sex that are not included in the total males and total females served. For some service types, the sum of the male and female unduplicated consumers does not equal the total unduplicated consumers for that service type, because the total column includes consumers of unknown sex.

Monthly Inpatient Utilization for Non-Priority Adults and Children: FY 2003

Number of Inpatient Discharges

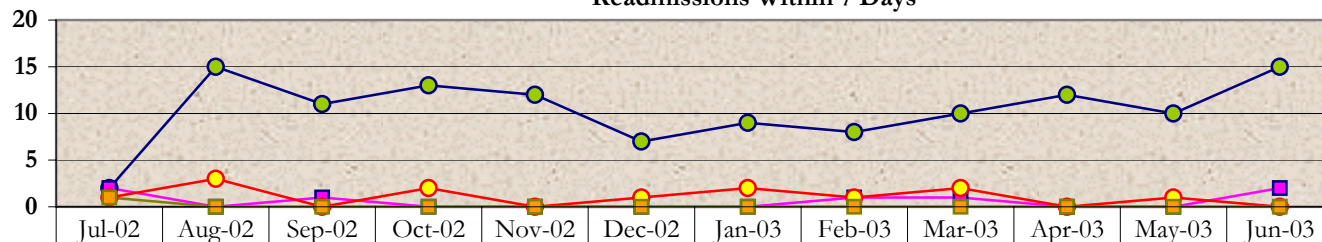

Discharges are defined as inpatient records with bill type 111 or 114 and revenue code 1x4, 1x6, 1x8, 944, or 945.

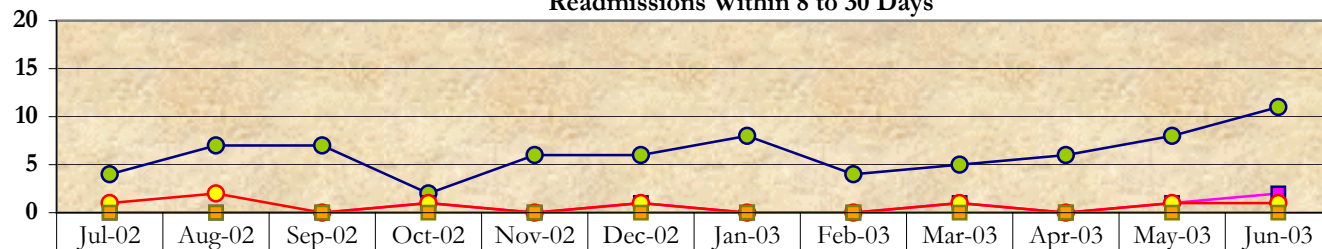

Readmissions within a given month are defined as those discharges during the month for which the individual had a subsequent admission within 7 days or 8 to 30 days, respectively.

Public facilities are defined as the five Regional Mental Health Institutes (RMHIs): Lakeshore, Memphis, Middle Tennessee, Moccasin Bend, and Western. Private facilities are all other inpatient facilities.

Readmissions Within 7 Days

Readmissions Within 8 to 30 Days

Adults are defined as enrollees age 18 and over as of the date of the service received. Children are defined as enrollees under age 18 as of the date of the service received.

Number of BHO Prescriptions and Number of BHO Prescription Recipients by Select Therapeutic Class Non-Priority Adults and Children by Sex, Race: FY 2003

BHO prescriptions refers to the number of prescriptions for "BHO drugs," as determined by the Bureau of TennCare.

These pharmacy data were calculated separately from the service utilization data presented previously, and the degree of overlap is unknown. Consequently, enrollees who received only pharmacy services are not included in the overall persons served.

* Adult total columns include an additional 13 prescriptions for 13 recipients and child total columns include an additional 3 prescriptions for 3 recipients of unknown sex or race. Not included in these tables are an additional 22 prescriptions for 2 recipients of unknown age.

The therapeutic class "Other" includes psychotropic drugs not included in the other classes as well as a variety of other medications used in conjunction with psychotropic drugs to combat side effects.
